QA Automation Selenium with Java

M3, Oak Tree Apartments / 9486771585 / sahilkumr347@gmail.com

Synopsis: Over 5+ years of experience in Software Testing. I have extensive experience in web, windows automation testing and manual testing, expertise in crafting automation framework architecture, performed proofs of concepts and automation feasibility to identifying best tool for automating applications.

EXPERIENCE SUMMARY

- Having around 5+ years of experience in Testing Software applications.
- Extensive experience in **selenium** test for Functional UI automation, Regression testing, Sanity testing, Smoke testing.
- Gained experience in requirement analysis, test planning, test estimation, test design, test execution, defect and test reporting.
- **Highly skilled in automation framework designing**
- **Skilled in developing web, windows and excel macro applications for automation testing.**
- **Can easily adapt to the any automation tool and technologies.**
- Provided value additions and developed innovations at necessary phase to increase the productivity.
- Performed proofs of concepts and automation feasibility to identifying best tool for automating applications.
- **Leading a test automation team.**
- Preparation, execution and reviewing Automated Test Cases.
- **Followed an extremely light and efficient agile process**, easy and fast, to prioritize among projects and manage a program in an agile manner.
- Hands-on knowledge in Automating ERP like **Salesforce (Lightening), Oracle Fusion and SAP fiori**.

Areas of Experience

Industries
Serivce based Industry.
Healthcare

Applications
Web, Windows.

Functional Automation Tools
Selenium-Web Driver.

Automation Framework
Struts, keyword driven, Data driven and hybrid driven, UI Automation.

Programming language
Java, Selenium.

Web Technologies
HTML, Java Script, XML.

Version Control Tools
GIT.

Defect Tracking Tool
JIRA

QA Automation Selenium with Java

QUALIFICATION

Qualification	University	Year of Passing
B.E(CSE)	Anna university	2014
HSC	Higher Secondary	2010

WORK EXPERIENCE

Project #1

Product Name	: Salesforce – CPQ LTC Pricing.
Role	: Manual & Automation Test Analyst
Environment	: Web application automation
SDLC	: Agile
Duration	: Oct 2019 to till date.
Client	: IQVIA - US

Description: The objective of this product is to allow to user to replace the current Quintiles International Pricing (QIP) tool (an internally-developed pricing tool) with a vendor solution (Apttus). Apttus is a market leader (Forrester) solution that offers strong flexibility, functionality to meet our needs, and fits within an end-to-end bidding-contracting ecosystem. The primary purpose of a UPT tool is to sustain the relationship of an organization with its customers once the product is delivered to customers. Over the time, along with providing CPQ services.

Roles and Responsibilities:

- Analyzing user stories and/use cases/requirements for validity and feasibility.
- Execute all levels of testing (System, Integration, and Regression).
- Collaborate closely with other team members and departments.
- Directly Communicating with Clients
- Involved in understanding and analyzing the business requirements
- Prepared estimation to the given requirements
- Design the regression Scenarios.
- Execute all the test case and report defects, define severity and priority for each defect.
- Carry out regression testing every time when changes are made to the code to fix defects.
- Work with cross-functional teams to ensure quality throughout the software development lifecycle.
- Familiarity with Agile frameworks and regression testing.
- Ensure that all tested related work is carried out as per the defined standards and procedures.

➢ **Worked as Software Analyst in Chain sys, Chennai till 20th September 2019.**

Product #2

Product Name	: appBOTS
Role	: Automation Test Analyst
Environment	: Web application automation(Selenium Web driver)
SDLC	: Agile
Duration	: Sep 2015 to till Sep 2019.

Description: The objective of this product is to allow to user to test the web based application and for Data loading. This product is developed using Struts framework, so that the product might be very user-friendly to non-technical users. It will reduce the manual testing resource, time and reduce the error. The test scenario create using this tool is reusable as any number times. Once bulk UI testing or data loading is completed it will generate the details summary and test case execution document it find the pass and failed test scripts.

- It can be executed in different browsers and in remote machine.
- Parallel and sequential execution can be performed using this tool.
- Test Data can be given through Excel, Json, and constant data.
- Readymade template for Enterprise application like Salesforce, Oracle, SAP, etc.
- Details reports for the executed test suite.

Roles and Responsibilities:

- Expertise in understanding and analyzing test requirements, Tracking changes and maintenance of test requirements.
- Well versed with handling elements in selenium web driver.
- Creating and maintaining the Test cases, Test scripts and scenario.
- Executing the Test scripts for periodic builds.
- Involved in Manual and automation testing.
- Identify the requirement for automation.
- Understand functionality of the application and analyze the impact of changes.
- Design the regression Scenarios.

PERSONAL PROFILE

Father's Name	V. RAVI CHANDRAN.
Date of Birth	11-07-1993.
Age	28.
Gender	Male.
Marital Status	Married.
Languages Known	Tamil, English, kannada.
