SKILLS

Java, Spring boot, Maven

Redis

Kafka

MySQL, MongoDB, Snowflake, Google BigQuery

Docker, Kubernetes

QueryDSL (ElasticSearch)

VanillaJS, AngularJS

HTML. CSS, Responsive Design

Jira, Confluence

EDUCATION

B.E in Software Engineering

Mehran University of Engineering & Tech

Jamshoro, Pakistan

RESIDENCE

US Permanent Resident (Green Card)

AVAILABLITY

September onwards

WORK EXPERIENCE

09/2018 – present

Software Engineer
Visual Meta GmbH. █████, Germany

- Extracted 12 Microservices (Spring-boot) from a common monolith application.
- 20+ deployments / day (Jenkins & Kubernetes Environment)
- Wrote Meaningful and Robust Test cases
- Styled & Wrote multiple new Page Types using HTML, CSS & VanillaJS
- Contributed to CMP Cookie Banner Implementation (SourcePoint)
- Implemented Redis Cache to reduce load time
- Implemented Monitoring by sending Metrics to Prometheus & DataDog
- Successfully Integrated Optimizely (External Tool) to support our AB Tests
- Contributed to multiple Bash Jobs to automate Manual Processes.
- Implemented efficient REST APIs and Caching Mechanisms. Helped improve our load times by 30%

09/2017 – 09/2018

Senior Java Developer
Daraz, AliBaba Group. ███████, Pakistan

- Worked as the only Engineer in their BI-Team (and Telecom Team)
- Wrote Batch Jobs with Java Spring to fetch everyday Ad data from Google, Facebook, Adjust and other platforms and source into DWH.
- Built a tool that fetched and visualized data using Charts JS from Google BigQuery & ElasticSearch.
- Built a UI for a Backend Tool (via REST) for more control to Stakeholders.
- Maintained and created documentation for various Projects

01/2015 – 05/2017

Software Engineer
GfK Etilize. ███████, Pakistan

- Integrated a WYSIWYG Editor to our Platform for Manufacturers to create their Rich Content for their Products.
- Contributed in maintaining, adding new features to the current platforms.
- Helped built a tool that converted different Product feeds to our in-house feed template for our CMS Import.
- Built a tool that generated reports based on ElasticSearch data and visualized in an Excel Sheet with automated Graphs and meaningful insights.
- Supported Amazon, BestBuy, IngramMicro etc. to Integrate our API into their platform for Product Data Retrieval.
- Created JS snippets that load Product data as a widget on any page.

PROJECTS

Sindh Education Department's Website with Backoffice (Java, MySQL, HTML, CSS, JS)

████████████████████████████████

- Built from scratch, a scalable and Robust platform that serves 1+ Million requests / week.
- Wrote It's backend which helps non-tech users to edit/remove & create new pages using the Integrated WYSIWYG Editor.
- Built Support to add new languages using translation keys.
- Collaborated with The WorldBank's Team & Sindh Education Dept. practicing Agile Methodologies.
- Built different widgets that can be placed anywhere around the portal with custom data (Facebook, Instagram, Text-scroll etc.) without any technical-expertise.
