ACADEMIC PROJECTS

Mini Project   Project:

1

Title:	Student Attendance Intimation with Email.
Technologies:	Apache Tomcat.
Language:	Java.
Data base:	SQL.
Operating system:	Windows.
Role:	Developer.

Description:

It allows students to login and check theirs attendance percentage which is integrated to biometrics. This is made easy for the faculty and school/college administration people in reporting to the parents about their child's absence to the classroom. This project gives the intimation to parents about their absence of the student for the college through Email using Email API's, this process will give an easy, low cost and automatic solution.

Main Project at RCI(Research Centre Imarat)

Project: 2

Title:	GUI for Missile Testing & Launching.
Technologies:	QT GUI Framework.
Operating system:	Linux.
Role:	Black box testing.

Description:

The project software is developed in Linux Platform using QT GUI Framework which deals with design of user-friendly GUI for Missile Testing & Launching. The GUI software developed under this project can be explained for missile application such as missile sub-system testing, missile data logging, integrated missile testing and missile launching. This type of GUI software is extremely useful & customizable for different types of applications in defence and industrial/commercial sectors. Modularity and platform independence of the project can be exploited to great extent for expanding scope of the project software.
