WORK EXPERIENCE

Front-end Engineer Indegene Private Limited

11/2019 - Present

Bengaluru

Technology-led healthcare solutions provider.

Achievements/Responsibilities

- Working on an Angular web application named ICB(a descriptive meta-data tagging tool). Constantly adding new features, updating, upgrading and keeping the application bug-free.
- As we switched to the trunk-based development strategy from Git-flow, **I implemented feature flag based access in the Angular application**. Created a dashboard using which we can easily toggle the features. The new flow **boosted the team's efficiency by 20-30% and saved at least 4-5 days/month spent on branch management**.
- Streamlined the deployment process of the front-end by **setting up the CI/CD pipeline**.
- I upgraded the Angular application from **version 6 to version 8**.
- Created APIs for converting HTML content or URLs to PDF using NodeJS and Puppeteer thus **avoiding the need for a paid online service**.
- Worked on a **highly reactive keyword annotation tool** which made the keywords tagging process very easy for the end-users.

Contact : Soviek Saurav, Solution Architect - 8861220884

Front-end Developer ClearTax

07/2019 - 11/2019

Bengaluru

India's largest consumer Income Tax e-filing website.
