Mobile: +91 9902737870

Email: sunil.sunxiil.choudhary@gmail.com

Experience of 6 Years in Web Development field in areas of UI Development (Flutter (1 year), React Typescript(2 years), Angular (5,6,9) (4 years), React JS(2 years), D3 JS, Jquery, Javascript and Bootstrap)

EXPERIENCED SKILLS

UI: Angular (5,6), React JS, Angular JS 1.x, jQuery, Javascript, JSON, D3 JS and Bootstrap, HTML, CSS

Backend: Node JS(Express Framework), PHP

Integration: Rest API

EXAMPLE WORKS

<https://todo-sunil.stackblitz.io/>

<https://beginsmartjs.github.io/>

OUT OF BOX SKILLS

Design programs with minimal code redundancy and flexibility.

Explanation: Developers tend to use javascript without using OOP methods or without proper modularity in the UI which leads to many pages or lengthy codes which then leads to instability and sometimes errors can also be seen in console and sometimes change in one piece needs to change in many places, hence outcome is ineffective.

My Solution: I have been using OOPs in javascript. I have been using objects and I have complete depth knowledge of javascript and jQuery which enables me to reduce code length and make it very effective.

PROJECT

Main Project Title: Web Based Insurance App for Agent to Ease the process of there Applicant

Project Description:

Web Based Insurance App for Agent to Ease the process of there Applicant

Software tools used:Visual code, Winmerge, Google chrome developer tools,

Technologies used: Node JS,React Typescript, CouchDB, PouchDB, Bootstrap 4 & CSS, JSON, Flex based css

Main Project Title: External Segmentation APP in Eloqua Environment

Project Description:

Pre-requisites: Eloqua is automation Marketing App which provides environment to fill in the Customers in their database. Likewise, Salesforce is the environment for business and database use.

External Segmentation is an integration tool which is the same as Eloqua Segment provides the flexibility to query data from Salesforce and represent it in Eloqua for other Marketing Purpose.

UI Development of Ext Segmentation includes graphical SOQL Query building with features like grouping, ungrouping, Relational Objects(like child parent relationship), drag and drop, customizing operators like assignment or comparison (all in graph).

Software tools used: Sublime Text 3, Winmerge, Google chrome developer tools, Batarang Plugin, SVN Tool.

Technologies used: Node JS,Angular 5, JQlite, Javascript, Bootstrap JS & CSS, JSON,D3

Main Project Title: Kodiak Centralized Web-based PTT Administration (Admin Tool)

Project Description: (It's a very big project and has indeed very vast number of features. Below I am writing my role in the project. For more information go to link

<http://pushtotalkbykodiak.com/features/push-to-talk-centralized-admin-tool.html>).

UI Development of Admin tool for PTT Administration which includes build & Assign Talk Groups, allocate contacts to each of your PTT users, filtering out the required data using advanced search and normal search. Drag and drop feature for assigning contacts. Customizable Pagination feature for vast data. 'Select all' feature as for the currently selected Page. Expansion feature for certain data.

Software tools used: Sublime Text 3, Winmerge, Google chrome developer tools, Batarang Plugin, SVN Tool.

Technologies used: Angular JS, JQlite, Javascript, Bootstrap JS & CSS, JSON

Main Project Title: Quietgrowth Pvt Ltd. Website Project Description: It is a financial website based on online automated investment. The website will provide portfolios. This each portfolio will contain a group of stocks with their performances in their past. According to performance the website stick a risk to this portfolio. The client can choose a portfolio with the given risk and start his account and invest in that portfolio, but also he can change his chosen portfolio before any kind of Investment in that portfolio. Also by default website is choosing a portfolio with the given user details.

Software tools used: Sublime, Brackets, Notepad ++, Wamp, Xampp, Android Studio(for android), Git, Google Chrome Developer tools, Winmerge.

Technologies used: Javascript, Jquery, D3 JS, Bootstrap, Full Screen Form Wizard, JSON, PHP, Codeigniter, PL/SQL and Android.

Conclusion. It would be very easy to Invest in Stocks and certainly headaches of many Stockholders will be reduced.

SOFTWARE TOOLS KNOWN

Sublime, Brackets, Notepad++, Wamp, Xampp, Android Studio(for android), Git, SVN, Google Chrome Developer tools, WinMerge, Kdiff, (Mozilla, Safari and Opera Developer tools), Visual Studio, Excel, Word, PowerPoint, Command Prompt.

WORK EXPERIENCE

I have been working in ReactJs for 2 Years from October 2018 in Candela labs as Software Engineer for various projects. Main Project is Insurance Management tool for Agent
