EDUCATION:

Bachelor of Engineering in Information Technology – (2007),
University of Mumbai. Mumbai, India. 400098.

Diploma in Computer Technology – (2004),
Maharashtra State Board of Technical Education. Mumbai, India. 400051

EXPERIENCE SUMMARY:

- 8+ years of experience in SAP ABAP with various client engagements including exposure to **implementation, upgrade and support projects** in roles ranging from developer to team lead.
- Proficient in **interacting and building positive relationships** with end users and **business stakeholders** to turn the business processes into IT solutions.
- Worked in **Product based** and **Consulting industries**.
- Worked for different client engagements across multiple industry sectors focusing on **SD (Sales and Distribution), MM (Material Management), SCM (Supply Chain), FI (Finance) and FSCM (Financial Services Claims Management) SAP modules**.
- Successfully designed, developed and implemented custom applications utilizing efficient **database design, reports (ALV)**, interface developments using **OData, RFC's and ABAP proxies** to external applications.
- **EDI** including extensions to **IDOCs** for communication between SAP instances and EDI with customers/vendors following ANSI X12 guidelines.
- Performed customization of **user-exits/BADI** implementations/**BAPI's** to enhance SAP delivered solutions, **Data dictionary** extensions/additions (SAP and Custom Table Development), **Smartform** creation and translations,
- Developed tools to automate data upload using BDC's.
- Well versed on **Performance Tuning, Debugging and Code Optimization techniques**.
- Performed **troubleshooting** and **fixing critical issues** during **on-call support**.
- Experience of working in **on-shore/off-shore** model.
- Excellent in performing **gap analysis, requirement gathering** and **effort estimates** for change requests.
- Proficient in **preparing technical design documents** based on the functional specifications.
- Dedicated professional with **strong analytical** and conceptual **problem-solving** abilities, **diligent, forward thinking** and a great **team player**.
- Passionate about **learning new technologies** and quickly adapt to new environments
- Knowledge in **CDS views, AMDP and BI**.

TECHNICAL SKILLS:

Certifications:	SAP Certified Development Specialist-ABAP on HANA 2.0
ABAP Skills:	Data Dictionary, Reports-Classical, ALV, BDC, User-exits, IDOCs, SAP Scripts, SMARTFORMS, BAPI, Enhancements, Web Services, ABAP Proxies, Interfaces, BADI, OOABAP, Module Pool (Dialog programming), OData, ABAP on HANA, CDS Views, AMDP.
SAP System:	SAP ABAP version 4.6.c, SAP ABAP version 4.0.b SAP ECC 6.0, SAP NetWeaver 6.0 and up, SAP HANA
SAP Modules:	SAP SD, SAP MM, SAP FI, FSCM, SAP BI
Software:	Eclipse, Seeburger for EDI Mapping.

Reliance Worldwide Corporation.

(Aug 2020-Present)

Location: Texas, USA

Role: ABAP Developer

About: RWC manufactures and distributes premium quality plumbing and heating products. RWC has implemented SAP as their ERP solution for their manufacturing and distribution processes.

Key Responsibilities:

- Interacting with business and end users to understand the business processes and gather requirements to transform them into sustainable SAP solutions.
- Acting as a business analyst and coordinating with the BI team to help build BI reports.
- Assisting the HANA Data modeler in building SQL views.
- Improving performance of existing objects by redesigning the solution and implementing the same using new coding standards, resulting in reduced load on the system for background jobs.
- Design, develop and modify programs, objects, configuration, and processes to meet the user demands and requirements in the Supply Chain and Inventory and Forecasting areas.
- Collaborating with other technical groups, business leaders and process owners on enhanced business solutions and process improvements to adapt to the changing business needs.
- Responsible for scheduling batch jobs for the different report programs for end users.
- Responsible for addressing any issues during SAP upgrade and support pack upgrades.
- Perform functionality tests of new and updated applications and systems to verify desired results are achieved.

- Mapping vendor systems with the SAP system using IDOC and EDI technology.
- Building different tools to automate data upload to the SAP system using BDC and LSMW techniques.

Deloitte Consulting India Pvt Ltd

(May 2010-June 2013)

Client: Ecolab, MBC (Manitoba Blue Cross), MPC (Marathon Petroleum Corporation), Univar Europe and Avnet.

Location: India and Germany.
