PROJECTS WORKED

Pay Roll System: Developed for the organization to automate and streamline payroll for the employees. It calculates the employee net pay value by considering salary, allowances, tax deductions and leaves of the employee. It is mainly designed to organize all the tasks of the employee without any hassle.

Food Delivery Application: Basically, this concept is like a digital approach of traditional food delivery model. Here the app is serving as a platform, which offers access to numerous restaurants and at the same time, it also maintains a logistic network for the delivery personnel
