Experience summary

I have 12+ Years of experience as a Business Consultant. My areas of expertise include **Agile transformation, Agile Coaching** and **Program Management**. I have implemented lightweight approaches (**Scrum, Kanban**) as well as scaled approaches traditional **waterfall approach**. My specialization is in large scale **project management** and has delivered numerous full-cycle IT Projects.

Relevant engagements

- As an **Agile Coach** for a **Global Pharmacy company**, where I managed several teams on delivering a reporting and visualization solutions on Tableau. I am experience in **guiding** and **mentoring** other scrum masters on Agile project methodologies and also shared **best practices**. I have co-ordinated with product owners and **coached** the scrum team to generate deliverables as per agreed Epic and helped resolve many issues faced by the scrum team during the course of this project. I have taken coaching workshops for **Business Stakeholders** and team members to guide on **Agile Delivery Model**
- I was the **Scrum Master** for an Equipment Manufacturer, which was a **S4 HANA Transformation program**. I coordinated with multiple stakeholders to standardize **project controls, governance, and reporting structure**. I also, **addressed development obstacles** and led the teams in **defining solution approaches** to fulfill client requirements. I **tactfully managed** the **timeline** of the project to keep **scope creeps at minimal**
- I was a **Scrum Master** for a **Gaming Company in the US**, where I managed a team to **implement** and **deliver** a **web application**. I was **proficient in achieving stringent sprint milestones** without any delays, thus delivering **on time and on budget**. I have contributed with the **prioritization** of user stories and coordinated with scrum team members for **estimating efforts** required. I planned and facilitated in **testing**. I have also adopted best practices from different **Agile methodologies** like **XP and Kanban and incorporated** in the project
- I worked as a **Test Lead** for a Healthcare giant, where I prepared test strategy, involved in test planning, analysed the business requirements, identified use cases and designed a process for improving transformation libraries and to achieve efficient worked on testing tools and accelerators, resulting in cost savings.
- I have been instrumental as a **QA Manager** for SFDC, ETL testing projects and managed a team of 14 testers across locations.
- I have been a strong **practitioner of AGILE** and keeps contributing to the AGILE Learning forums by **mentoring** the Team Members or by sharing valuable insights on **Best Agile practices**
