Ccfurnishing.co.uk

WCC is an application that is mainly used for online presentation and it is the product of on24.com. In this application user can create their presentation and choose presentation type such as present by phone, using webcam, Present by PC microphone, Simulive and sim2live and on demand presentation. There are basically two types of events: One is live event and other is On demand event. User can view live presentation if he chooses presentation type such as Phone, Webcam, PC microphone. User can view On demand presentation anytime. Once event gets completed it converts into on demand event. Four types of users are: Producer, Presenter, Q&A and Audience. Producer has all the access of the presentation he can set up presentation and manage the complete event. Presenter does not have complete access on presentation than Producer. Q&A user has less authority and Audience can view only presentation and group chat and questions from producer/presenter

Roles and Responsibilities:

- Go through the SRS document, understand the functionality and prepared Test Cases.
- Test cases preparation for the possible scenario.
- Test cases execution.
- Involved in System, Integration Testing.
- Regression Testing.
- Prepare the Defect report
