- Familiar with testing tools Postman, Fiddler, and Swagger UI.
- Familiarity of working in all SDLC phases with agile product development.
- Good communication skills and the ability to work efficiently, quick learning & working with new technologies to fulfill project needs.

Technical Proficiency

- **Technologies:** C#, Asp.Net, ASP.NET MVC, .NET Framework, OOPs, HTML, CSS, Ajax, Web API, JavaScript, JQuery, SharePoint.
- **Database:** SQL Server 2017.

Education & Credentials

- **B.E.**(Electrical Engg.) from Solapur University year 2018(63.67%)
- **Diploma** In Electrical Engineering (MSBTE) year 2014(68.47%)
- **SSC** (State Board) from D.H.K. Prashala Pandharpur year 2011(85.09%)

Professional Experience

- Currently worked as a **Software Engineer** in **Yash Technologies** from June 2021 to Nov 2023.
- Previously worked as a **Software Engineer** in **Square Vision Pvt. Ltd.** from April 2020 to June 2021.

Achievements

- **Star Achiever** Award in Project.
- **Star Team Achiever** Award in Project.

Project Title: FileShare To 0365 Migration.

Technologies: Dot Net, SharePoint, Shareget

Description

I am working on the File Share Services migration project. In this project, we use C# and SharePoint online. We build one console app where we extract the hyperlinks from the folder files. In this project number extension files are used. We have used the Sharegate tool for migration. Migrating the data from File Share to SharePoint sites. Creating the new sites and libraries and assigning permission to users. Making the report on migration data

Responsibilities

- Understand the requirement and coding as per requirement.
- Fix application issue and code regulations.
- Update the links and maintain the documentation.
- Data analysis and mapping the path.
- Assign the permission to the sites for users and groups.
- Creating the sites and library with proper naming convention.
- Involving daily scrum meeting and sprint planning meeting.

Project Title: Ferrovia Services.

Technologies: Dot Net, SharePoint, Shareget

Description

The File Share Services migration project is what I work on. In this project, we use C# and SharePoint online. We create a console application in which we retrieve hyperlinks from folder files. Numerous extension files are used in this project. For migration, we have made use of the Sharegate tool. data migration from file sharing to SharePoint websites establishing the new websites and libraries and granting users access. Preparing the migration data report

Responsibilities

- Understand the requirement and coding as per requirement.
- Fix application issue and code regulations.
- Update the links and maintain the documentation.
- Data analysis and mapping the path.
- Assign the permission to the sites for users and groups.
- Creating the sites and library with proper naming convention.
- Involving daily scrum meeting and sprint planning meeting.

Project Title: SBUT Portal

Technologies: C#, MVC 5, Web API 2, Entity Framework, JavaScript, HTML, CSS, JQuery.

Database: SQL Server 2017

Description

This application is designed and developed to make the college student interview process very easy so they can maintain all data in a single place, and it's beneficial to maintain all history. This application has multiple users, like TPO, SUB TPO, students, company HR, and interviewers. Every user has their own roles and responsibilities. This application has medium complexity. Because multiple user roles and their registration processes make this application more complex, Application flow starts when TPO creates and notifies company HR with credentials, using which HR logs in and creates job postings. Which are reviewed and approved by TPO and broadcasted to individual students on their dashboard and also in their email box and inbox. As per job criteria, students can apply for job posts and undergo the interview process. This application manages all functionalities, like capturing interview feedback, selection,, and uploading offer letters. This portal is maintaining all activities of all users to make sure there are no frauds. This application is secured with authentication and authorization.

Responsibilities

- Actively participating in daily scrum meetings and part of sprint preplanning meetings.
- Implementing on all assigned stories and technical discussion with senior team members.
- Fixing issues in the application & code reviews.
- Requirement understanding and creating estimates for the features of the project.
- Worked on database table designing and writing stored procedures.
- Creating and maintaining feature branches on Git.

Personal Information

- **Name** Shreeepad Nanasaheb Yadav
- **Nationality:** Indian
- **Gender:** Male
- **Languages Known:** English, Marathi and Hindi
- **Hobbies :** Playing Chess.

Declaration

I declared that the information given above is true and current to the best of my knowledge and belief.
