P R O J E C T S

❖ **LMS Platform :-** A learning management system (LMS) is a software application for the administration, documentation, tracking, reporting, automation and delivery of educational courses, training programs, or learning and development programs. The learning management system concept emerged directly from e-Learning. Although the first LMS appeared in the higher education sector, the majority of the LMSs today focus on the corporate market. Learning Management Systems make up the largest segment of the learning system market.

Client – Aakash (Recently acquired by BYJU'S)

Project Description: A web application and mobile application for the students who prepare for NEET and JEE exam.
- Involved in Integration, Functional, End–to-End, Regression and UAT testing
