## Summary

---

A result-oriented professional with 5+ years of experience in End to End Application Feature Development using Java Technology, developing charts and graph using d3js. Seeking assignment in IT profession where I can utilize all my capability, knowledge and skills which I have learnt till date.

## Employment History

---

**Capgemini India Pvt. Ltd. | West Bengal, Kolkata**  
**Associate Consultant | 09/2016 - 07/2019**

**Business Domain:** I was working in a **Utility** account and apart from developing new product features was working with fixing existing bugs in the product. It also involved interaction with product management for getting clear information about the feature to be developed. Also learnt to work on strict timelines and more than one features in parallel. I have gained complete knowledge of end to end business domain of the product which has been a plus point. I have been working on developing a web application using angular 8.

### Project Description:

- Deals with distribution of electricity.
- Handles installation of electrical devices at customer sites and fixing the issues with the devices depending upon requirement.
- Maintains details of electrical equipment's.
- Handles meter data delivery to the client.

### Responsibilities:

- Translate user story to functional application.
- Developed new application and added functionality to existing applications using Java Technologies.
- Wrote some SQL Queries to retrieve data from database.
- Developing a web application from an existing desktop client.

**Libsys IT Services PVT LTD(CTH WIPRO) | Karnataka, Bengaluru**  
**Software engineer | 10/2019 - 03/2021**

I was working as a full stack developer with springboot microservices, java, angular 8, html, css. Along with this I have also learned d3js charts and graph which I have used in the product we developed.

### Responsibilities:

- Build graph like worldmap, violin plot line, bar, scatter plot using d3 js for the products developed.
- Written backend spring boot services for the data to fetch from database and store them in json format for the graph to display.
- Written angular code for the front end application.

**Libsys IT Services PVT LTD(CTH Deloitte) | West Bengal, Kolkata**  
**Senior Software Engineer | 04/2021 - 11/2022**

I worked as a java developer with aws, aws lambda and code deployments in aws account, with front end changes to angular applications.

I worked Single handed for complete change of servlet project to Spring MVC project with deployment to AWS server for CI/CD

### Responsibilities

- write company standards code in java
- deploying the code to aws account (cloud deployments)
- worked with the datadog for accessing logs of project and adding time efficiency to end point results.
- worked on AOP modules
- worked on adding additional features to angular developed application
