- Backend: Dot net core 6.0,.Net, Ado.Net,Entity Framework
- Programming languages: C#
- Application/Web Servers: IIS
- Operating system: Windows
- Database: SQL Server
- SCM Tools: SVN

Work Experience:

- Software Developer at Legasis Services Pvt Ltd, Pune (Jan 2023 – March 2024)
- Senior Software Engineer at Nitor Infotech , Pune(May 2022-December 2022)
- Dot Net Developer at C-Edge Technology, Mumbai(May 2021-May2022)
- Associate Software Engineer at Mphasis, Pune (Oct 2018-May 2021)

Educational Qualification:

● **Bachelor of Engineering (Computer Science and Engineering)** August 2013–June 2017 | MBES College

Professional Experience:

Legasis Services Pvt Ltd

Project: LegatrixNxt
Tools &Technologies: VS Code,SQL Server12/19,C#,SVN,Postman, net core 6.0 api,Ado.net, Entity Framework
Project Synopsis: Legatrix NXT, an IT- enabled legal support service interface is designed to provide a one – stop solution to manage organization compliances. The solution is designed keeping in view the real life scenario. The compliance management involves defining, executing compliance tasks based on the defined calendar.
Roles & Responsibilities:
- Worked on modernization of application using .net core 6.0 api.
- Developed and assisted in migration of web application to Angular application.
- Performed testing for API Endpoints using Postman and Swagger.
- Implemented Secure authentication and Authorization mechanism using JWT.
- Worked with database technologies MS-SQL Server to design schemas and write efficient queries.
- Worked closely with QA team to identify and fix the bugs.
- Collaborated with front-end developer to integrate frontend component with backend API's.
- Created clear and comprehensive technical documentation for API's endpoints and codebase and maintained up- to -date API documentation for developers.

Nitor Infotech

Project: Symphony SummitAI
Tools &Technologies: Visual Studio 2022, SQL Server 12, C#,.net core 6.0 api
Project Synopsis: SummitAI Asset Management is a multi-tenant system, which enables the enterprises to manage Assets across tenants and it can also be used to manage IT and Non-IT Assets, such astables, chairs, shop floors Assets through the entire Asset Life Cycle Management including depreciation of the Assets.
Roles & Responsibilities:
- Worked on modernization of application using .net core 6.0 api.
- Developed and assisted in migration of web application to Angular application.
- Worked on Add assets, update assets and Delete assets components of Asset management module.
- Worked on SQL part to create Common Table Expression (CTE), Stored Procedures, Functions.

C-Edge Technology

Project: SBI-Pension Processing
Tools &Technologies: C#, OOPS, Web Forms, Visual Studio 2015, SQL Server 12, Postman
Project Synopsis: This is a service-based project was related to SBI Pension initiative for client to avail pension through State Bank of India to retired employee.
Roles & Responsibilities:
- Developed .net web application using C#, Web Form, Web API, Java script.
- Provided user support, resolved Production issues.
- Consumed existing APIs into .net web application.
- Worked closely with QA team to identify and fix the bugs.

Mphasis

Project: BORAL AMS
Tools &Technologies: Visual Studio 2015, .Net Framework 4.5 , C #,SQL server, Entity Framework,Ado.net.
Project Synopsis: Boral is the largest integrated construction materials company in Australia, producing and selling a broad range of construction materials including quarry products, cement, concrete, asphalt and recycled materials.
Roles & Responsibilities:
- Involved in designing and developing .net web application using Visual Studio 2015, .Net Framework 4.5 , C #,SQL server, Entity Framework.
- Worked on Production support to existing .net applications. Resolved users' queries, worked on User Tickets.
- Code debug, analyze, Code change.
- Developed and implemented new product and provided information and support when required.
- Worked closely with QA team to identify and fix the bugs.
