ABOUT ME

A backend developer with experience in developing, testing and maintaining microservices with Java and SpringBoot technology. Self motivated professional with ability to quickly master new technology to drive process improvements. Strong team player with excellent communication and collaborative abilities.

TOOLS

BitBucket, Jenkins, Mockito, Eclipse, Spring Tool Suite, SoapUI, JUnit, Splunk, AppDynamics, Postman

SKILLS

Java, SpringBoot, Data Structures, API Testing, Unit Testing, SQL

EXPERIENCE

Tata Consultancy Services   **New Delhi, Delhi**
Assistant System Engineer   July 2019 - Present

- Developed code bases using SpringBoot and Java technology for the Banking sector to be used across different markets.
- Participated in requirements gathering and design development meetings for microservices/APIs
- Helped to write unit cases using JUnit and Mockito technology for different applications.
- Performed API and Load Testing using tools like Postman and SoapUI.
- Identified, tracked defects and resolved them by completing additional tests.
- Updated old code bases written in TIBCO to SpringBoot APIs, resulting in lower operation costs.
- Knowledge of Spring Cloud along with JSON and XML formats.
- Performed root cause analysis using tools like Splunk.
- Worked with tools like BitBucket and Jenkins to create a common code base and deliver on time.

Samsung R&D   **New Delhi, Delhi**
Software Engineer Intern   February 2019 - April 2019

- Partnered with the company mentor to learn best practices in software test case design.
- Planned and executed effective functional tests and carried out exploratory testing to assess product performance.
- Completed testing under tight deadlines to meet client demands and project timelines.
