PROJECT DETAILS

1)Lejoy

Lejoy is an amazing food delivery app where customers, delivery boy, chef, and your favorite restaurant play a crucial role. Chef cooks and schedules food while the user orders for it. Then, the delivery boy delivers prepared food to the predefined address of the user within a fixed time period. Even the user can track the food delivery process. So, this app is the best platform for food and cooking lovers.

Language:Java

Status:Completed.

2)Stem Driver Solutions

Stem is an online platform in which the user (driver) can see all the jobs posted by the different shippers and place a bid on the same in order to apply for that job. Transport carriers will post about the jobs for the users with a detailed description of them. The shipper will be responsible for sending goods from one place to another. This platform will help the drivers to track their job history, Payment related information, trip-related information
