Project Details

[BlueStacks]

PROJECT: BGP (BlueStacks Global Player)

Duration: June 2019 – Present

Role: Member Technical Staff - QA

Team Size: 22

Description: BlueStacks is an app player emulator by which android applications can be run on Windows and as well as Mac. Just like an android phone works, it replicates the same working and UI on the Windows and MAC. It is fastest emulator as compared to others. It supports different GPU's like Intel, AMD and NVIDIA thus making it more acceptable to today's laptops and computer's configuration. It supports OpenGL and DirectX as well as advanced AI which helps in playing games like PUBG, FreeFire, GTA, etc.

Responsibility:

➢ Working as a part of BGP-QA team to regularize and update regression suite.
➢ Understanding of the business requirements and raising Ambiguities and Gaps
➢ Creation of Test scenarios and Test cases for Functional Testing.
➢ Performance Testing of App player and games w.r.t to competitors.
➢ Creation & Assistance in Test Scripts for Regression Testing.
➢ Performing Validation, Functional, and User Interface testing
➢ Re-Testing and Regression Testing on the Logged Defects and update the new status.

[MetLife GOSC]

PROJECT: SMD (Small Market Digital) – Majesco

Duration: July 2018 – May 2019

Role: QA - Test Engineer/ Dental Lead

Team Size: 12

Description: Majesco is a provider of digital insurance platform software and it enables business models through policy, billing, claims, distribution management, task assignment and data analytics. Currently it is for Property & Casualty (General Insurance), Life, Disability and Dental insurance.

Responsibility:
- Worked as a part of Automation team and used Selenium Web driver, TestNG & Maven.
- Understanding of the business requirements and raising Ambiguities and Gaps
- Creation of Test scenarios and Test cases for E2E Testing.
- Creating Test Scripts for regression suite using Automation Selenium WebDriver and TestNG framework for a subsequent release.
- Involvement in Test Execution, RTM Preparation & Test Summary Report.
- Performing Validation, Functional, and User Interface testing
- Re-Testing and Regression Testing on the Logged Defects and update the new status.

PROJECT: EBS - Salesforce

Duration: Aug 2017 – 2018
Role: QA - Test Engineer
Team Size: 08
Description: Salesforce has allowed companies to organize information including Sales, Accounts & Contact information in one central location with an interface for case management and task management. At the receiving of client card information from legacy systems like CDF, MetFacs2, CBS, and MACADS user can search Client Card in SFDC by Customer Name & Customer Number.

Responsibility:
- Review BRD's & FRD's to understand the system.
- Involved in Developing Test Cases based on the Scenarios, SRS
- Execution of the Test cases.
- Using SQL for checking/verifying data.
- Performing Validation, Functional, and User Interface testing
- Re-Testing and Regression Testing on the Logged Defects
- Execute Test Cases and Defect logging.
- Execute Test Cases on Perfecto for Mobile Testing.
- Prepare Test Summary Report.

Education

- **Bachelor of Technology in Computer Science & Engineering** from Sharda University, G.Noida (UP) graduated with an aggregate of 65.6% marks in 2017.
- **12th (**CBSE Board) from Agra Public School, Agra (UP) with an aggregate of 65% marks in 2013.
- **10th (**ICSE Board) from St. Peter's College, Agra (UP) with an aggregate of 80% marks in 2011.

Certification
