Assist in design & developing for the future strategy of networks and telecommunications products. Seeking to leverage proven achievements, exercise my skills and experience to prosper with the company.

### Skills

Python

JavaScript

NodeJS

ReactJs/Redux

Docker

Jenkins

Shell Scripting

HTML/CSS

PostgreSQL/SQL

Docker

Robot Framework

### Organization

**Alethea Communications & Technologies PVT Ltd**

(08/2020 - Present)

**GoodWorkLabs PVT Ltd**

07/2019 – 07/2020

### Education

#### ● Master's in Computer Application

Vellore Institute of Technology, Vellore (2017-19)

#### ● Bachelor's in Computer Applications

PT. Ravishankar Shukla University, Raipur (2014-17)

### Projects Undertaken

#### ● SWAT WICHECK ATF (Client- CISCO) 10-Aug-2020 - Present

- SWAT Wicheck is a micro service architecture which supports extensive interoperability & scale tests with real world scenarios for 100+ clients.
- Wicheck automates configure, coordinate, maintain, execute, collect data and generate reports and run tests.
- As a part of implementation team for creating end-end traffics, testing and cloud deployment
- Expertise in data visualization using Elastic search and Kibana
- Technologies used NodeJS, JavaScript, Docker, Jenkins and Kibana

#### ● VISION AI -Visual Search Capability (Client- CoWorks) Feb 2020 – June 2020

- Leverage Machine vision to enable users to search items by images or videos for improving search capabilities
- Act as the developer with pre-processing and extraction of text from images, documents and PDF.
- Delivered ML and NLP based OCR solution for data extraction
- Filtering of data using lemmatization and tokenization
- Technology used is Python, NLP, Python Image Library and Naive Bayes

## Languages

---

- **English**

*Full Professional Proficiency*

- **Hindi**

*Full Professional Proficiency*

- **Malayalam**

*Working Level Proficiency*

- **Tamil**

*Working Level Proficiency*

## Certificates

---

Diploma in RPA Developer  
Foundation Training UiPath and SAP  
AUTOMATION.

Micro Certification in Injection Flaws  
3CPE/CEU CERTIFICATION SC-  
8eed1c16dbbf414b by CYBRARY.

Presented paper on “A Named Entity  
Recognition Technique for knowledge  
Discovery in Research Scenario” at 15TH  
International SET (Science Engineering and  
Technology) Conference 2017 held at Vellore  
Institute Of technology, Vellore.

## User Management System (Client: GoodWorkLabs) Aug 2019 – Feb 2020

- User Management System is a product of GoodWorkLabs. Which supports handling various users' detail's mapped with their roles and actions
- Each user has their actions respect to roles and their dashboard
- Worked as a full stack developer for creating user and associated role action for handling users for different projects
- Technology used in React JS, Node JS and PostgreSQL

## Work Experience

---

### Software Engineer-Telecommunications

- Hands on experience in from feasibility study of a process documentation to deploying projects to production environment.
- End -end implementation of new features for the product
- Deployment of Cloud service including Docker and Jenkins job
- Automating scripts
- Assist with proactively identifying problem areas with trending activities and repo
- Develop test plans to verify performance and functionality, isolate and rectify problems

### Associate Software Engineer- Full Stack

- Expertise in Web application development
- Develop responsive layouts using Material UI
- Hands on experience in creating Rest API's and writing SQL queries
- Well versed with deployment process using Heroku and documentation using Swagger
- Proficient with life cycle management and possess good logical and analytical skills
- Proficient with Git and Workflows
