Product Development Projects

Project 1: SAM Salesforce Connector

Team Size: 5

Technology Used: REST API Callouts, Apex Classes, Batch Apex, Scheduler Apex, JSON, Lightning Components, Custom Settings

Description: SAM Data Source provides different contract opportunities through REST API. SAM connector will fetch this opportunities using this connector.

Roles and Responsibilities:

- Involved in developing full project development.
- Involved in Development of module needed for business.
- Task management for Team

Modules:

- 1) Create and Auto Update Opportunity Module
 - 2) SAM Filter Criteria Module
 - 3) SAM API Key expiration Module
 - 4) SAM Connector Module
-

Project 2: FedCLM (Federal Contract Lifecycle Management) Product Development

Team Size: 3

Technology Used: Apex, Lightning Components.

Description: Contract lifecycle Management solution offers a more scalable and transformative solution for growing businesses. With an easily configurable and automated approach in CLM. Users can easily add our Maintain effective oversight on every stage of the contract lifecycle. With easy configurability and key features, you can better manage common tasks such as tracking subcontractor, flowdown clauses and simplify challenges such as managing a large library of FAR/DFAR clauses across multiple lines of business.

Roles and Responsibilities:

- Involved in developing full project development features.
 - Technical Support plus new Development as per business need.
-

Project 3: GovWin IQ Connector (GovWin IQ Connector)

Team Size: 3

Technology Used: REST API, Apex Classes, Lightning Components.

Description: GovWin IQ Connector enables to automatically import opportunities from GovWin IQ and keep up to date with the day to day changes by notifying your enterprise via email if any changes occur regarding an opportunity. This extension fetch the opportunity from GovWin Website to Salesforce Org. GovWin IQ Connector links your desired opportunity through the GovWin IQ Opportunity Id number located on the website.

Roles and Responsibility:

- Involved in developing full project development.
 - Involved in Development of module needed for business.
 - Involved in the Development of new Design and functionality.
-

Client Based Projects

Project 1: TDI Community Lightning Migration

Team Size: 6

Client: TD International USA

Technology Used: TDI Lightning migration project is totally based on convert existing functionality into Lightning. I worked on many Lightning Components like Tab Menu in community, Submit for approval component, DDQ Create and Update functionality using record edit form, Triggers, Process Builders to generate task for community users.

Roles and Responsibility:

- Involved in developing full lightning migration development.
- Design & Implementation of Lightning components for TDI Community.
- Involved in full deployment process of Community.

Project 2: Thornton Lightning Migration

Team Size: 6

Client: Thornton Tomasetti USA

Technology Used: Thornton Tomasetti project is totally based on convert existing functionality into Lightning. I worked on Convert existing VF Pages, JavaScript buttons into Lightning Components.

Roles and Responsibility:

- Involved in developing full lightning migration development.
- Involved in developing lightning components and unit testing.
- Involved in full deployment process of components using change sets.

Project 3: FedPM Lightning Application

Team Size: 3

Client: CNB

Technology Used: Fedpm is a lightning component based application where customers, Organization, Govt. Contractors can manage their projects, task, milestones, financial data and meetings. It is a lightning ready application where we managed the above things. Also we built custom charts to manage financial data related to each project.

Roles and Responsibility:

- Involved in developing full lightning migration development.
- Involved in developing lightning components and unit testing.

EXTRA CURRICULAR ACTIVITY

- Lightning Web Components Training Session for Technomile Salesforce Team.
- Knowledge Sharing Session on VS Code for Salesforce Development.
- Knowledge Sharing Session on SFDC CLI for Salesforce Development.
