

Brief introduction about experience

I am a Senior Integration Consultant with over 13 years of experience in the IT industry, specializing in integration architecture and consulting. With a strong background as an Integration Architect, I have successfully designed and implemented scalable integration solutions for clients in domains such as telecom, manufacturing, and banking. My expertise in Agile project management and exceptional client communication skills enables me to effectively lead and deliver successful integration projects.

Experience Summary

- Extensive experience in integration architecture and consulting, with a focus on designing and implementing scalable solutions for clients in telecom, manufacturing, and banking domains.
- Proficient in technologies like Mulesoft, TIBCO, EMS/JMS and API Gateway, with a deep understanding of integration patterns, API design, and data modeling.
- Strong expertise in Agile project management methodologies, effectively collaborating with stakeholders and senior leadership.
- Skilled in client communication and relationship management, having successfully worked on-site during critical project launches.
- Experienced in maintaining GIT branches, deploying code through CICD pipelines, and ensuring smooth code management and production deployment.

Educational Qualifications

I have completed **Bachelor of Technology** in Electronics and Instrumentation Engineering from JNTU University of colleges.

Professional Experience

- Currently working Infosys Limited.
- DXC (Formally Known as HPE) (Oct 2012 to Oct 2017)
- L&T InfoTech (Aug 2010 to Oct 2012)
- Team ware Solutions (Jan 2010 to July 2010)

Project Details

Project Experience on Mule			
Client	Working on Mule since last 4 years for Singapore based clients who are in domain of financial service and telecom service. Most of my work involved in designing integration solutions and engaging team in complex operational issues.		
Start Date	June 2019	End Date	Till Date
Role & Contribution	<ul style="list-style-type: none">• Actively involved in technical design and efforts estimation discussions and update in Confluence.• Managed the Release planning, Sprint planning and assign JIRA tasks to team.• Triaging the defects both in production and non-production environments.• Created Mule artifacts, configurations, and deployment of applications.• Created RAML specifications in Anypoint platform and had used fragments such as Traits and libraries to enable reusability.• Design and developed Mule flows for both REST and SOAP services using different connectors.• Managed the application deployments across different environments and Sprints.• Deployed applications using CICD pipelines and update Maven configuration and dependences.• Updating SSL certificates and encryption keys across environments		

	<ul style="list-style-type: none"> Maintained Azure Containers to places blob files.
Tools	Integration: Anypoint Studio, API Manager, Exchange, Anypoint runtime manager, Design Center, SAP SuccessFactors plugin Project Management: JIRA, Confluence, ServiceNow Cloud: Azur Container, AWS S3 buckets Repositories: Bitbucket, GitHub Others: Postmen, SOAP UI, OpenSSL, Key tool, Key store, Informatica MFT

Project Experience on TIBCO			
Client	Worked on TIBCO products for different clients who are in domain of telecom, defense, personal & beauty care services.		
Start Date	January 2010	End Date	May 2019
Role & Contribution	<ul style="list-style-type: none"> Led and managed the Operations team responsible for the maintenance and management of customer care and billing modules. Responded promptly to consumer incidents and effectively resolved operational issues. Fine-tuned system and operational applications to optimize performance. Developed interfaces by utilizing mapping details provided by end users, addressing any issues or queries that arose in collaboration with stakeholders. Maintained continuous communication with onshore/offshore counterparts, subject matter experts (SMEs), and Business Analysts from the client side to gather requirements for Change requests. Deployed code onto the cloud environment and conducted knowledge sharing sessions to ensure smooth implementation. Provided support to the testing team for functional and performance testing in various environments. Analyzed defects raised in Quality Center and actively worked towards their resolution. Facilitated the deployment of the latest code and released it by raising TECRs (Technical Change Requests). 		
Tools	Integration: TIBCO Business Works 5.x and 6.x, TIBCO EMS, TIBCO Administrator, TIBCO API gateway, TIBCO Spotfire, TIBCO TRA, TIBCO API Gateway Project Management: JIRA, HP Quality Center, Remedy, Service Now. Repositories: GitHub, CVS Others: Postmen, SOAP UI, OpenSSL, Key tool, TOAD, VISIO, Putty, WinSCP, Linux
