TRAININGS

Microsoft Azure Training Day: Fundamentals

Microsoft, Online

Jun 2020 - Present

Developing Machine Learning Applications

Amazon Web Services, Online

May 2020 - May 2020

Gained insights about machine learning applications and made it very much useful in building my applications as a project.

PROJECTS

Website

Feb 2020 - Feb 2020

<https://github.com/maddurimaheshvardhan/Website>

Created a website to showcase my Portfolio and Social Profiles. I have used HTML, CSS, JS technologies.

House Rental Management System

Jan 2019 - Mar 2019

<https://github.com/maddurimaheshvardhan/HouseRental>

This project made house search easy to those who are in need of house, at the same time the owners are no need of setting tolet board anymore. A click from tenant and owner of house made house search and providing rent made simple with this project

Music web application

Sep 2018 - Oct 2018

<https://github.com/maddurimaheshvardhan/MusicWebApp>

This application objective is to develop a platform where an individual can download songs for free which includes no net banking which these days getting troubled due to cyber attacks. Only registered user can get the access to this system.

Asset Mapping by ISRO

Oct 2017 - Dec 2017

should map the assets in the localities and submit by pointing out the location with details Bhuvan portal app :)

Snake Game

Mar 2017 - Mar 2017

Created it as a part of test for my skills in c++
