

Professional Summary

- **7.10 years** of experience in IT and **2+ years** of experience in **OFSA**
- **5+** years of experience in Analysis, Design, Development, Implementation and testing using **OBIEE12c**.
- Experience in OFSAA **Run/Rule Framework** , Forms Framework , **Data Quality Framework** and Unified Metadata Manager
- Experience in defining **Batch jobs** and schedule Batches using **ESIC** in OFSAA
- Experience in OFSAA **Data model** and Data Modeling using Erwin data Modeler, compatible tools in OFSAAI.
- Good experience in OBIEE **Repository** (Physical Layer, BMM Layer and Presentation Layer).
- Experience in developing Dimensional **Hierarchies/New logical columns/ Filters/ Variables** as per business requirements.
- Expertise in designing and development of **Dashboards, Reports, Local and Global Filters** in OBIEE.
- Having Experience in implementing **OBIEE data level** and **object level security**.
- Experience in configured **Cache** Management and **MUDE**
- Experience in Creating **Session variables, Presentation Variables** and Web catalog.
- Expertise in Creating Dashboards prompts, pages, links, images, embedded content, text, folders, **Action links**, Action Link Menus, **Agent**, alerts and **BI Publisher reports**.
- Experience in **sql/PLsql** (like Functions, Procedures and Packages)
- Experience in both Waterfall and Agile methodology.

Experience Summary

- Working as Senior Software Engineer in **Wells Fargo Center** from July 2016 to till date.
- Worked as a Software Engineer in **SLK Software Services** from June 2013 to June 2016.

Technical Skills

| | |
|--------------------|---|
| Tools | : <i>SQL Developer, TOAD, Putty, ERWIN, ALM</i> |
| Databases | : Oracle 11g, Exadata 12c ,Teradata |
| Operating Systems | : Linux,windows server 2008, Windows 7/10. |
| Languages | : sql/plsql, Java script,Shell script |
| Other Technologies | : <i>Autosys, Jira,Jenkins,Udeploy</i> |

Educational Qualifications

- B.Tech from JNTU Anantapur in 2010.
- Intermediate from Board of Intermediate in 2006

Professional Experience

Project 3: Profit view

| | |
|---------------------|---|
| Client | Wells Fargo |
| Role | OFSAA/OBIEE Consultant |
| Technologies | OFSAA,OBIEE11g/OBIEE12c, Informatica,Teradata, Exadata |

Project Description:

Profit View is a new cross sell system that calculates relationship profitability for Wells Fargo Wholesale Relationships. Profit View will provide accurate, complete and timely relationship profitability and is delivered via a user interface platform. It leverages standardized calculations, business rules, and data and will contain role-based security to ensure proper use of data.

Profit view will provide wholesale businesses and Product partners with critical, accurate profitability BI in a timely fashion to drive the relevant decisions and enhance business profitability. Profit view mainly looks upon Relationship, Product, Officer/Manager, Organization profitability

Responsibilities:

- Involved in Analysis, technical specifications, development, deployment and testing in OFSAA & OBIEE11g
- Configured Data Entry forms and Queries in OFSAA
- working on Data Management tools (Data source, Data Mapping & Post Load Changes) in OFSAA.
- Configured Data quality rules based on business requirement using OFSAA
- Involved in Data Model design using OFSAA.
- Develop/Enhance code based on the request - OBIEE.
- Upgradation to OBIEE12c.
- Implemented write back functionality extensively in Financial Attribution
- Change request creation, documenting and implementing the tickets.
- Working knowledge on Autosys, Github, Jenkins and Udeploy

Project 2 : PSG

| | |
|--------------------|------------------------------------|
| Client | Emerson |
| Role | OBIEE Developer |
| Environment | Oracle BIEE 11g, Oracle 11g |

Project Description:

Working as an Oracle Business Intelligence Developer resource and this project involves building of a Data Warehouse solution to meet the various requirements of

Client Emerson PSG Divisions, which are located across the country. The basic requirements for Client PSG Divisions with respect to sales and distribution are Stock availability across location and products, Sales reports, analysis, Inventory Management, Order Management, Customer Accountancy and Sales. The main focus of this Project was Performance, Quality and Bug free release.

Responsibilities:

- Developed the OBIEE Metadata Repository (.rpd) using OBIEE Server Admin tool by importing the required objects (Dimensions, Facts & Aggregates) into Physical Layer using connection pool, developing multiple Dimensions (Drill-Down Hierarchies) & Logical & Facts / Measures objects in Business Model Layer, and creating the Presentation catalogs in Presentation Layer.
- Created Dimensions and Hierarchies and Measures
- Implemented Time Comparison and Calculation measures in the business model using Time series Wizard.
- Configured and implemented Usage Tracking Subject Area
- Customization of Dashboard and dashboard management.
- Configuring Agents to deliver the reports using OBI delivers.
- Implementing the object level security in the project.
- Enhancing the subject areas as and when suggested by the business analyst.
- Configured Event pooling table in the project.
- Worked with the ETL team to design the Star Schema and populate the Data warehouse.
- Involved in building Physical Layer /Business Model and Mapping Layer/ Presentation Layer of a Repository by using Star Schemas.
- Involved in creating Dashboards for the reports also using Action links and Action Link menus.
- Involved in Performance Tuning of reports by identifying the indexes required on the backend tables and also from the data available in the Cache.

Project 1: Technology Upgrade

| | |
|--------------------|--------------------------------------|
| Client | Emerson |
| Role | OBIEE Developer |
| Environment | OBIEE 11G/10g,Oracle11g/10g,. |

Project Description:

I worked as an Oracle Business Intelligence Developer and involves Upgrading the current BI 10g version to OBIEE 11.1.1.7 and also upgrading the database stack as well as the operating system and hardware for the project. This project involves building 3 servers Dev, Stage and Production environment. It also involved creation of new dashboards, Analysis, Subject Areas based on the Requirements provided.

Responsibilities:

- Involved in the End to End Implementation of this project. Installed OBIEE 11.1.1.7 and Configured on Windows Environment.
- Upgraded the BI 10g catalog to 11g and involved in LDAP authentication and

providing security for all

- Report status to stakeholders, mitigate risks, coordinate meetings, set agendas, and assign action items
- Manage the client relationship, address client requirements, meet the projects specifications and deadlines, and ensure client satisfaction.
- Customized Reports look and Feel using Column Formatting & Conditional formatting.

Configuring LDAP Security in BI Publisher through Microsoft Active Directory and providing access to Dashboards.
