PROFESSIONAL SUMMARY

Dynamic Software Developer with four years of hands-on expertise in Microsoft technologies to design, develop, and deploy robust solutions using Microsoft Power Platform – PowerApps, Power Automate and SharePoint Online. Recognized for both independent initiative and collaborative teamwork, I possess a relentless drive to learn and adapt, coupled with effective communication skills that foster an environment of shared knowledge and success.

AREAS OF EXPERTISE

- PowerApps Canvas Apps and Model Driven Apps
- Microsoft Dataverse, SharePoint Online
- Power Automate Workflow
- SharePoint Framework (SPFx), SharePoint Rest API
- React JS, JavaScript, HTML5, CSS3
- ShareGate Migration, Apps4Pro Migration, PowerShell scripting

PROFESSIONAL EXPERIENCE

Accenture - Application Development Analyst

October 2021 - Present

- Conceptualized, designed, and developed PowerApps Canvas Apps, utilizing Dataverse and SharePoint as a data source for agile and scalable applications.
- Customizing forms for a SharePoint list using PowerApps Customize forms.
- Proficient in implementing deep linking and role-based access management strategies within PowerApps for seamless navigation and user experience.
- Develop and implement automated workflows using Power Automate, integrating them seamlessly with PowerApps to streamline business processes.
- Created multiple Notification Flows using Power Automate.
- Leveraging Trigger Conditions, Configure Run after, parallelism, loops and Expressions in Power Automate for reducing processing time.
- Integrated Power Bi reports/tiles into Canvas Apps.
- Analyzed and transformed existing InfoPath forms into efficient PowerApps solutions, optimizing workflow efficiency and user experience.
- Reengineered SharePoint workflows using MS Flow, improving process automation and task execution.
- Tenant-to-Tenant migrations using ShareGate tool, ensuring zero data loss and seamless transition within strict timelines.
- Created PowerShell scripts and automated processes across SharePoint, OneDrive, and Teams, minimizing manual efforts and ensuring consistency.
- Responsible for handling the UAT process.
- Providing training and technical support to end-users, ensuring effective adoption and utilization of developed solutions.

ITC Infotech - Information Technology Consultant

September 2019 – October 2021

- Involved in requirement gathering processes, collaborating with Business Analysts to plan, develop, and deploy solutions.
- Developed reusable SPFx solutions with ReactJS, enhancing SharePoint functionality.
- Created custom forms using PowerApps Canvas Apps leveraging SharePoint as data source and automated design logic with MS Flow.
- Developed and deployed a comprehensive approval workflow using Power Automate, ensuring clear status updates resulting in improved transparency and accountability.
- Executed content migration from SharePoint 2013 to the cloud utilizing ShareGate tool.
- Tenant to Tenant migration of SharePoint and OneDrive using ShareGate tool and PowerShell scripts.
- Managed SharePoint configurations, including user permissions and OOTB feature utilization.
- Performing testing to ensure application functionality, performance, and security, debugging and troubleshooting as needed to maintain high-quality standards.

EDUCATION

B.E in Information Science & Engineering

Sahyadri College of Engineering & Management – 2019
