## PROJECTS

### College Enquiry Chat Bot: (06/2020 - 12/2020)

- The College bot project is built using artificial algorithms that analyses user's queries and understand user's message.
- This System is a web application which provides answer to the query of the student. Students just have to query through the bot which is used for chatting.
- Students can chat using any format there is no specific format the user has to follow.
- The System uses built in artificial intelligence to answer the query and also to check that answers are appropriate to the user queries.

### Human Written Digit Recognition: (01/2021 - 06/2021)

- The primary objective of this project is to take handwritten Digits as input, process the digits, train the neural network algorithm, to recognize the pattern and modify the character to a beautified version of the input.
