LinkedIn: https://www.linkedin.com/in/sonypriya1998/

Professional Summary

Vulnerability & Patch Management Lead with over 4 years of experience driving security and compliance across hybrid cloud infrastructures (Azure, VMware). Proven expertise in implementing and managing vulnerability management programs using tools like **SCCM**, **Tanium** and **Qualys**.

Adept at streamlining patch management processes through automation and scripting, ensuring rapid remediation of vulnerabilities while minimizing operational downtime and maintaining **endpoints security** up to date.

Implemented and followed **ITIL**-based processes using **ServiceNow** as the **ITSM** platform for incident, change, and service request management.

Core Competencies

- Vulnerability Management: Leading identification, assessment, and remediation efforts for security vulnerabilities.
- Patch Management: Managing automated patch deployment using SCCM, Intune, and PowerShell.
- Security Collaboration: Partnering with cross-functional IT and security teams to mitigate threats.
- Process Optimization: Designing strategies to enhance the vulnerability management lifecycle.
- Technical Documentation: Developing and maintaining robust procedures and training materials.
- Compliance Reporting: Generating detailed reports on vulnerability status and remediation efforts for senior management.

Professional Experience

Cognizant — Vulnerability Management Engineer June 2021 – Present

- Vulnerability Management: Strengthened security resilience by leveraging WSUS, SCCM, Tanium, and Qualys to manage vulnerability scanning and patching activities. Improved vulnerability remediation timelines by 35%.
- Patch Deployment: Designed and implemented patch management frameworks for Windows servers and endpoints using automated tools (e.g., Tanium, SCCM, Intune).
- Collaboration: Partnered with IT and security stakeholders to prioritize vulnerabilities based on risk impact.
- Process Documentation: Authored and updated vulnerability management processes to align with compliance standards.

- Automation: Streamlined patch deployment and system updates using PowerShell scripts, reducing manual intervention by 40%.
- Team Training: Delivered training sessions on vulnerability management best practices to team members.

Technical Skills

- Cloud Platforms: Azure, VMware
- Vulnerability Management Tools: SCCM, Qualys, Tanium, Batch Patch, Intune
- Automation & Scripting: PowerShell, Chef, Microsoft power automate
- Monitoring & Collaboration Tools: New Relic, Confluence, ServiceNow ITSM
- Networking & Security Concepts: Active Directory, DNS, SSL

Certifications

• Qualys Vulnerability Management (in progress)

Education

B. Tech (Honors in Mechanical Engineering)
Sreenidhi Institute of Science and Technology, Hyderabad (2016–2020)
Graduated with 8.39 CGPA

Achievements

- Enhanced system uptime by 40% through proactive vulnerability assessments and patch automation.
- Reduced deployment times by 50% by integrating CI/CD pipelines with automated security checks.

Soft Skills

• Leadership | Problem Solving | Time Management | Analytical Thinking
