FEB 2021- OCT 2021

HCL Technologies/ Technical Lead

Role & Responsibilities
- Worked as a NetSuite developer, on various type of OTC, P2P and R2R processes.
- Worked on Jira's, Incident being a part of all call and Requirement.

AUG 2015 – Jan 2021

Wipro Technologies

    AUG 2015 - Nov 2019 (Student Computer Application)

    Dec 2019 – Jan 2021 (Senior Software Engineer)

Role & Responsibilities:

Completed 3 months of Training and then assigned to Project.

 I started my first project as an Associate developer that was Support/Development Project. PS team log the ticket on Jira with specified issues with print screen, will check the task assigned on names and then starts.

I have worked on all the Suite Scripts 1.0 and RF Devices where we did same NetSuite UItransaction on it.

- Worked on Warehouse Management like (Inventory Management, Order Management and Tracking System).
- I have worked on all types of Inventory Process (Inventory Creation, Inventory Replenishment, Cycle Count and Inventory Adjustment).
- I have worked on PTP, OTC, Work order, Transfer Order.
- I have Worked on Saved Searches, Reports and Advanced PDF.
- Worked on Data Migration as lead, Migrated all the historical data like Transactions (SO, AR, PO, AR), Customers, items and JE in NetSuite. Setup all the configuration, Prepared BRD, FRD and Technical Document. Integrated NetSuite with Dell Boomi with Token Based Authentication in Real-time sync.
- I have integrated NetSuite with Dell Boomi, Creating Sales order whenever transaction has been created in Lawson System. Dell boomi reads the data from Lawson System and sends the data to NetSuite, I wrote Restlet, dell boomi calls restlet and checks either item or customer is available in NetSuite or not. If Item or Customer is not existing dell boomi calls restlet and providing the data, restlet creates records for them and then creates Sales order.
- I have worked on Plugin scripts though which I have integrated NetSuite with Cyber source, I have used Payment Processing Plugin API to integrate both the system.
- Authorization of Apple Pay, Google Pay, PayPal and Visa Checkout happened on Outside NetSuite, after referring those generated P/N Ref Number we create a Sales order. My plugin Script reads a P/N Ref Number from Sales order and then creates Payment Event. Once Sales order created updated with Payment event, customer can creates cash sales and Cash refund.
- Configured SCA for Payment Method PayPal, Credit Card and Online Bank Transfer (bancontact, ideal, eps, and giropay), Merchant first configure the Payment Processing Profile then Customer use the E-commerce site and use developed Payment Method on Site.
- I have created a Website for the Suite Commerce Advanced and Suite Commerce In store.
- Developed Approval Workflows like (Department based, Employee Based, Role based, Named based and Delegation).
- Developed Scripts for RMA order cancellation, when RMA getting created from Apttus my Script checks associated SO and on the basis of RMA Qty scripts does calculation and update the SO lines, if the RMA Qty is less than SO Qty then create another line for remaining, if both the Qty matches SO line will get closed.
- Worked on Customer Payment Integration where Dell Boomi reads the file from bank and creates a custom record in NetSuite, I have created a Suitelet Script where user will select the file and all the related custom records will display on it and user selects the records and save. For handling bulk record I have created Schedule Script. Script checks the condition, creates Customer Payment and Customer Deposit.
- Worked on Vendor Payment ACH, Once bill payment file has been generated my restlet used to retrieve the file and boomi picked the file calling the restlet and sends the files to Bank Sftp, after the file uploaded successfully then boomi sends the response call to restlet. Restlet update the user note of Payment File Administration.
- Created XML ACH Bank File Format.
- Almost 24 integration with NetSuite using dell boomi.
- Certified in dell boomi.

Area of expertise

- Suite flows, Suite Scripts 1.0, SuiteApp, Restlet and Java Script
  - Good Knowledge in Suite Script 2.0.
  - NetSuite Feature, Navigation, Creation of Entities and transactions.
  - System setup, Custom roles and configurations and Suite Builder.

Education

MAY 2015

Bachelor of Science/PGDAV, Delhi University

DECEMBER 2019

M-Tech in Software Engineering/Bits-Pilani, Rajasthan
