Professional Summary

- Having Overall 7+ years of experience in the Industry of Software is in to developing applications for iOS platform.
- Experience in developing iPhone OS applications using Cocoa, iPhone-SDK and **SWIFT** and ObjectiveC.
- Rich awareness and strict practitioner of Cocoa/iPhone coding conventions and styles.
- Able to design and develop rich **UI/UX** via programmatic as well as Storyboards.
- Experience consuming web services and having knowledge on using **JSON** Parsers.
- Good Hands on Experience in making Client Server applications for iOS Platform.
- Excellent team player having a zeal for independent task execution and possess good analytical abilities with passion to learn new technologies.
- Extensive knowledge of using various third party frameworks : **Agora, Alamofire, CRToast, SkyFloatingLabelTextField, IQKeyboardManagerSwift, SDWebImage, SVProgressHUD, StretchHeader.**
- Understanding of MVVM pattern and its execution.
- General understanding of UI design principles.
- Experience in creating distribution profiles, **IPA** files and submitting AppStore.
- Efficient storage of data storage using File System and **SQLite.**
- Knowledge on Version control, SVN.
- Worked on AutoLayout, AutoResizing and AnchorTag for All iPhone and iPad Sizes.
- Expertise in using the IDE like X-Code for developing mobile application.

Professional Experience

- Currently Working in application development for iPhone and iPad using Swift 5 and iOS 16 in **Smart Gig Technologies** since July 2022 to till now.
- Previously Working in application development for iPhone and iPad using Swift 5 and iOS 15 in **Avantao Technologies** since Sep 2021 to Jun 2022
- Previously working in application development for iPhone using Swift 4 and iOS 14 in **Escapade Technologies** since Sep 2018. To Aug 2021
- Previously worked in application development for iPhone using Swift 4 and iOS 11 in **YINSOL Pvt Ltd** since Sep 2016 to Aug 2018

Academic Details

- Completed **B.Tech,C.S.E** from **JNTU Kakinada.**

Technical Summary

Languages Known : Objective C, C , Swift and SwiftUI
Database : SQLite and SQL.
Development Tools : X code 14,1312.
Frameworks : Cocoa touch.
Operating System : Mac OS
Performance Tools.: Object Allocations, Core Animation.
Web Services : JSON Parsing, XML Parsing.

Project Details

Project #1

Project Title: INFINITY LEARN

Technology: Swift, iPhone SDK,Agora,Web Services, Push Notifications.

App Store : <https://apps.apple.com/ae/app/infinity-learn/id1642492194>

Description:

Infinity Learn is the ultimate learning app for classes 6 to 12 and a one-stop solution for all your infinite learning needs. Specially designed for the K-12 students - CBSE, IIT JEE, and NEET, the Infinity Learn App offers LIVE online classes, learning materials such as videos and flashcards, assessment modules, and much more.

Responsibilities:

- Understanding the requirements of project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #2

Project Title: INFINITY META

Technology: Swift, iPhone SDK,Agora,Web Services, Push Notifications.

App Store : <https://apps.apple.com/ae/app/infinity-meta/id1642533966>

Description:

Infinity Meta is the ultimate learning app for Sri chaitanya schools Specially designed for - CBSE, IIT JEE, and NEET, the Infinity Learn App offers LIVE online classes, learning materials such as videos and flashcards, assessment modules, and much more.

Responsibilities:

- Understanding the requirements of project.

- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #3

Project Title: ACADEMIOS STUDENT

Technology : Swift, iPhone SDK, Chat, Web Services, Push Notifications.
AppStore. : <https://apps.apple.com/us/app/academios-student/id1570302075>

Description:

Academios Student is IOS mobile application which helps students to manage their study related tasks, like Home work, Leaves, Attendance, Activities, Reports, Notices, Meetings, Events, Time Table and more.

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #4

Project Title: ACADEMIOS PARENT

Technology : Swift, iPhone SDK, Chat, Web Services, Push Notifications.
AppStore : <https://apps.apple.com/us/app/academios-parents/id1568048273>

Description:

Academios Parent is a mobile application which helps parents to manage their children's study related tasks, like Home work, Leaves, Attendance, Activities, Reports, Notices, Meetings, Events, Time Table and more.

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #5

Project Title: ACADEMIOS TEACHER

Technology : Swift, iPhone SDK, Chat, Web Services, Push Notifications.
AppStore : <https://apps.apple.com/us/app/academios-teachers/id1570306920>

Description:

Academios Teacher is a mobile application which helps teachers to manage their student's study related tasks, like Home work, Leaves, Attendance, Activities, Reports, Notices, Meetings, Events, Time Table and more.

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #6

Project Title:UPPYO BUYER

Technology : Swift, iPhone SDK,Chat,Web Services, Push Notifications.

AppStore : <https://apps.apple.com/us/app/uppyo-buyer/id1597563116>

Description:

Uppyo can definitely compete for the status of the best food delivery in London, India, Australia, and other countries. The startup significantly invests in its tech development. It offers not only food from restaurants but also various items from retailers as well. You can opt for on-demand or same-day delivery and be absolutely sure that a courier will be at your doorbell just at the time that you've chosen. Being one of the most reliable and popular food delivery apps in the Countries, Uppyo is actively expanding not only within the country but on the international level as well

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #7

Project Title:UPPYO SELLER

Technology:Swift, iPhone SDK,Chat,Web Services, Push Notifications.

Description:

Uppyo can definitely compete for the status of the best food delivery in London, India, Australia, and other countries. The startup significantly invests in its tech development. It offers not only food from restaurants but also various items from retailers as well. You can opt for on-demand or same-day delivery and be absolutely sure that a courier will be at your doorbell just at the time that you've chosen. Being one of the most reliable and popular food delivery apps in the Countries, Uppyo is actively expanding not only within the country but on the international level as well

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #8

Project Title:SARATH CITY CAPITAL

Technology : Swift, iPhone SDK,Chat,Web Services, Push Notifications.
App Store. : <https://apps.apple.com/us/app/sarath-city-capital/id1445849715>

Description:

Sarath City Capital Mall is th biggest mall in south india.Its around 4000 car parking space and500 store.In this mall we are providing Indoor navigation system.and BLE(iBeacon) Technology.

Responsibilities:

- Understanding the requirements of project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift

Project #9

Project Title:TRICE

Technology:Swift, iPhone SDK,Chat,Web Services, Push Notifications.
AppStore:<https://itunes.apple.com/in/app/trice-community/id1383696181?ls=1&mt=8>

Description:

Trice is a market place & delivery app for large residential communities. Trice enables home entrepreneurs, neighbourhood stores to list & sell their products / services to the residents of the community.

Responsibilities:

- Understanding the requirements of the project.
- Designing the Views Using Interface Builder.
- Making connections and Application Coding using Swift
