## Education Qualification:

Bachelor of Technology in Electronics and Communication Engineering from JNTU University (Geethanjali College of Engineering and Technology)

## Professional Experience:

- Worked as a Boomi Developer in COGNIZANT From May 2022 to December 2022.
- Worked as a Boomi Developer and Support Engineer in GLOBAL LOGIC From December 2020 to March 2022.
- Worked as a Boomi Developer and Support Engineer in TECH MAHINDRA From November 2018 to December 2020.

### Technical Skill:

<b>Integration Tools</b>	Boomi.
<b>Web Technologies</b>	XML, Groovy Script
<b>RDBMS</b>	Oracle 10g
<b>CRM Tools</b>	Sales force (Connectors for Boomi)
<b>Boomi Connectors</b>	Disk, Database, FTP, HTTP, SOAP Client, Mail, SAP, AtomSphere API, Success Factors, Trading Partner Web Services SOAP, REST Services using Boomi (Event Driven Integration)

### Project Experience:

#### PROJECT #1: Cognizant

- ◆ Client : USA
- ◆ Role : Boomi Integration Developer & Support Engineer
- ◆ Duration : May -2022 TO December- 2022
- ◆ Skill : Boomi

### Roles/ Responsibilities:

- Involved in requirement gathering for Profiles & Maps.
- Involved in Development for various XML, Database, JSON, and Flat File Profiles.
- Developing various Maps based on their requirement using Java Script/Groovy Script.
- Developed & delivered around 16+ Boomi processes from Workstreams (Transportation, Supply Chain, Manufacturing, Infrastructure).
- Deployment & Scheduling the Batch process as per client Requirement.
- End to End Process Testing.
- Successfully completed multiple individual tasks within short timelines.
- Developed Process for inbound and outbound flows in uncomplicated way with the help of various Boomi components.
- Involved in requirement gathering from Client.
- Used Encryption /Decryption logic to maintain safety of the data.
- Worked on developing Business rules.

## PROJECT #2:Globallogic

- ◆ Client : USA
- ◆ Role : Integration Developer & Support Engineer
- ◆ Duration : December-2020 TO March -2022
- ◆ Skill : Boomi

### Roles/ Responsibilities:

- As part of Reverse engineering process, involved in analysis and gathering for many client interfaces.
- Involved in Development for various XML, Database, JSON, and Flat File Profiles.
- Transforming the data through integration field mapping.
- Successfully completed multiple individual tasks within short timelines.
- Deployment & Scheduling the Batch process as per client Requirement.
- End to End Process Testing.
- Involved in requirement gathering from Client.
- Used Encryption /Decryption logic to maintain safety of the data.

## PROJECT #3: TechMahindra

- ◆ Role : Boomi Integration Developer & Support Engineer
- ◆ Duration : November -2018 TO December- 2020
- ◆ Skill : Boomi

### Roles/ Responsibilities:

- Grasping the functional requirements and understanding the detailed low level design document.
- Preparing the Technical Design Document for the integrations in Boomi.
- Design, development, deployment and management of multiple integration processes created on Boomi.
- Used Encryption /Decryption logic to maintain safety of the data.
- Developed multiple processes and perform Unit Testing before moving the code to QA.
- Scheduling the interface based on the requirements.
- Involving in converting the Data Formats from one to another based on client requirement.
- Developed Process for inbound and outbound flows in uncomplicated way with the help of various Boomi components.
