PROFESSIONAL SUMMARY

I am working as Oracle PL/Sql Developer and Offshore/Onshore level Oracle DBA for an oracle DB based, revenue and tax project. As project is majorly functionally oriented so along with Technical expertise we need to work on functional side of requirements also. I am a techno functional Consultant for major and critical modules of project (Registration,Returns,Payment,Audit etc).

Requirement gathering from client, analysis, giving optimized solution in terms of cost and efforts, effort estimation, budget estimation, technical feasibility, performance feasibility, development, testing, deployment, documentation, data and bug fixing, DB monitoring, Patch Management and all such things are part of my role and my day to day activities.
