- **Operating System**

- **Browser compatibility Testing**   **:** Cross Browser Tool , Perfecto Mobile Testing

- **Data Analytics tool**   **:** Omniture Site Catalyst

PROJECT SPECIFICATION:

Title   **: Hewlett Packard (HP**) Ecommerce Transformation Program

Customer   **:** Hewlett Packard Company, California

Location	: Chennai
Role	: Tester
Front-end Tool	: IBM WCS (Management Center), PGS, FQM, Sterling (OMS), SAP
Middleware	: WESB, TIBCO, WLI
Back-end Tool	: SQL Developer, Data Load Propagation (DLP)
Test Management Tool	: ALM v11.5, JIRA & Test Rail
Period	: 27/06/2016 to till date

PROJECT DESCRIPTION:

The Hewlett Packard Company currently uses multiple ecommerce packages that are managed as independent applications. The large volume of customization has led to high cost of ownership in the current model and a disjoint experience. Hence HP has made a strategic decision to implement a single, state of the art ecommerce application for B2B and B2C, anticipating that with a new system that can improve the quality of the customer experience, generating important benefits for HP and its customers

- Improve consistency across markets and sales domains
- Simplify online experience
- Improve multichannel enablement / integration with retail channels • Build a Single, global B2C and B2B offering

RESPONSIBILITIES:

- Analyze the requirements and prepare proper test strategy, test estimation and test plan documents

- Identify the test scenarios and get the signoff from business and product owners.

- Reporting the status to internal and external management through daily calls & Meetings

- Monitoring and follow up the tasks on daily basis and ensure no slippage in schedules & efforts

- Managing the product releases on rotation basis

- Performed Analytics testing using Omniture tool with the team of 4 members

- Defect tracking across releases and publishing the dashboards to major stakeholders

- Documenting and publishing the execution status report on daily and weekly basis to all stakeholders

- Reporting and tracking of the defects found.

- Involving in Functional for Ecommerce site with responsive Design, Regression, Database, Web Services, System Integration, Sanity, Cross Browser testing and Mobile testing.
