🚀 Skills

SalesForce Apex Development
Apex Triggers Development
WorkFlows and Process Builder
Async Apex Vlocity DataRaptor
Vlocity Order Management Vlocity
Orchestration Plan Vlocity
Integration Procedures Vlocity
OmniScript

⊕ Objective

I have been working as salesforce and vlocity developer since 2.4 years, more comfortable on telco biased. I am experienced on implementation of Vlocity solutions integrated with salesforce platform for complex business flows for one of the best telco biased company in USA. I look forward to thrive on challenging environment with great opportunities that will get best out of me.

💼 Experience

Accentute   *Aug 2018 -*
Application development analyst

Vlocity and Salesforce Developer

○ Development associated with Order management system and crm for a major USA based client.

Vlocity

○ Developed Vlocity Integration Procedures to integrate external systems with salesforce.

○ Basic knowledge on omniscripts.

○ Worked and created on dataraptors to write, fetch and transform data to and from salesforce.

○ Created and worked on Orchestration plan for order management which includes Activation orders, Non-Activation orders, device swap and return orders.

○ Worked on calculation matrices to fetch price based on multiple attributes.

Salesforce

○ Worked customization part which mainly includes apex coding such as apex triggers, apex class

○ Worked on configuration part such as workflow rules, process builder

○ Single handed developed and deployed major functionalities to client and actively involved in overall business with client which also includes demo, onshore support and critical defects handling.
