Experience Summary

- **6.9 years** of overall Testing experience across projects as **SDET**.
- Hands on experience in Cross-browser, Cross-Platform UI testing & **Database testing**.
- UI Automation Script development for cross browser using **Java + Selenium & JavaScript + Protractor**.
- Experience in **API & Store procedure** (SP's) testing.
- Knowledge of **Jenkins for CI/CD pipeline**. Contributed to the development of automated test scripts for API testing using **Rest assured BDD Framework** & tools like **Postman**.
- Proficient in Functional, Regression, Smoke, Sanity, System, E2E, and Browser Compatibility testing.
- 1.3 years Automation experience in **TOSCA**. Also done several certifications for TOSCA.
- Strong Customer / Project Focus – Received customer appreciations for the same.
- Proficient in web application automation testing with **Maven's Page Object Model**, experienced in **Data- Driven** and **BDD Cucumber frameworks**, and knowledgeable in **TestNG** with expertise in handling various methods and parameters.
- Developed end-to-end automated test scripts using the Robot Framework for a web-based application.
- Well versed in **SDLC and STLC** methodology, developing **Test Strategy, Master Test Plan, Test Estimation, Test-Case Design and Test Execution, Test Summary Reports** and Defect Logs.
- I possess considerable experience utilizing Robot Framework with Python for streamlined and comprehensive test automation. My responsibilities have encompassed integrating automation processes into the DevOps pipeline, with a specific emphasis on **Microsoft Azure environments**.
- I have worked closely with cross-functional teams to smoothly integrate automated testing into the continuous integration and continuous deployment (CI/CD) pipelines of Microsoft Azure, resulting in a 30% reduction in the time required for regression testing.
- Hands on experience in using Tools **Eclipse IDE & IntelliJ IDE**.
- Experience in Defect tracking tool (**DevOps & Jira**) and providing efficient reports on defect status.
- Strong experience in **Agile-Scrum Methodology**.
- Hands on experience on **OTT App Testing** on **Mobile(Ios & Android)** and **TV(Samsung ,LG, Hisense, AppleTV/TVOS, Fire TV, Android TV, Roku, Fetch, Telstra, DSTV, Videotron)** platforms.

Employment Details

- Working as a Automation test Lead in **LTIMindtree LTD, Pune** for last **6.9 years**.

Experience Details

Technology Name	Experience	Description
Java selenium Automation	4.5 Years	Good working experience across the framework. Good grip in writing and executing the automation test suits and scripts. Involved in base framework setup. Have hands on experience in extent report customization.
Protractor Automation	1 Year	Defining the scope of the automated testing and its parameters. Planning, design, and development of any automation test strategy and its required environment. Test scripting and execution. Test analysis, reporting, and continued maintenance.
Tosca	1.3 Years	Involved in automation testing using TOSCA. Worked with all modules of TOSCA like Modules, Test Cases, Requirements, Test case Design & Execution Lists. Worked

		for TOSCA integration with Jenkins. Designed automation framework using Tosca and Individual contributor.
Rest assured	3 Years	Good working experience across the framework. Good grip in writing and executing the automation test suits and scripts. Involved in base framework setup. Have hands on experience in extent report customization.

Technical Skills

Primary Skills	
	Basics of Java & JavaScript, NodeJS, Protractor automation, Rest assured, TOSCA automation, API testing & Database testing.
Secondary Skills	
	UI Automation Testing using JavaScript with Protractor, Java with Selenium, Jenkins, New Relic monitoring, Browser stack, API testing using Postman tool.

Project Experience

Project/Product 1	British OTT Platform	Nov 22- Present
Customer Name	Britbox (BBC)	
Description	Britbox is OTT platform hosted on 17 platforms including TV, Mobile and Web.	
Tools & Technologies	Test Management tool: TestRail Test and automation: WebDriverio, Java & Rest assured & Browser stack. Front-end: iOS/Android Mobile & HTML TV DevOps: Jenkins Reporting Tool: JIRA	
Operating System	Windows 11	
Role Played	Test Lead(SDET)	
Responsibilities & Contributions	Facilitate QA team with their in sprint work, Keeping track of all production releases & making test Plan for release. Writing Test cases, review & Execute them & perform shift left testing. Testing Store procedures & API using postman tool. Automating new features and maintain existing test cases in WebDriverio & Rest assured. Identifying and logging bugs in JIRA. App dynamics monitoring for all real time error logs. Planning show and tell session with client at the end of every sprint.	

Project/Product 2	Business License Digital Transformation	Jun 21- Oct 2022
Customer Name	Wolters Kluwer (WK)	
Description	Manage the lifecycle of all business licenses and provide ongoing support based on subscription.	
Tools & Technologies	Test Management tool: MTM (Microsoft Test Manager) Test and automation: C#, Selenium. Front-end: .Net, Pega & Salesforce. DevOps: Jenkins Reporting Tool: Azure Devops
