## EMPLOYMENT HISTORY

### Lead UI Developer, Utthunga technologies Pvt ltd

Bangalore

October 2023 – February 2024

- . Worked on Bug fixing
- . Worked on iot platform and involved in sprint planning and scrum meeting.
- . Added unit test cases.

Project work:

#### 1.PCB- mobility-app

Project is based out of the iot platform where we have devices automation handled by the iot application which handles different devices.

### Lead UI developer, Harman Connected Service

Bangalore

Aug 2021 — October 2023

- Participated in agile activities and involved in a timely discussion of client deliverables.
- Interacted with tester for the betterment of features and deliver them in each sprint.
- Added new features on android as well as iOS platform devices using Vue and browser stack.

Project work:

#### 1. OCRR WEB application:

It is a healthcare application that usually deals with maintaining orders and results of admitted patients, it usually procures lists of patients and maintains a record of patients based on the Lookup table which keeps track of all the patients' work-list.

OCRR web application is a web application of Medway desktop application which is a legacy application.

### Software Engineer, CGI

Bangalore

Dec 2019 — Aug 2021

- worked and added features for custom mobile applications using ionic framework.
- Devised documentation for each app, detailing operation aspects, functions, capabilities, and features.
- Provided dedicated support and timely issue resolution to clients following successful app launch.

## PROJECT:

### 1. Raindance Application:

It is an ERP application that usually depicts invoice generation, submission, workflow configuration, and setting the rule set depending upon the invoice types. Workflow configuration usually has reviewing, accounting, and authorization foreach invoice depending upon the invoice and Event actions and the flow of the workflow rule-set.

## ACHIEVEMENTS

Got sprint Talent award in CGI

### 2.Workflow App:

An Ionic Application, which uses Angular Framework, is developed for supplier invoices. Based on the priority of the supplier, it is categorized in to-do lists on the home page.

When an invoice is kept for different workflows based on priority, it is made into different flows and assigned for a sign of invoices.

### Technology analyst, Infosys

Bangalore

Jun 2019 — Dec 2019

- Provided dedicated support and timely issue resolution to clients following successful application development and maintenance activity.
- Delivered weekly progress report to executive staff and informed applicable parties of upcoming milestones along with writing unit test cases using jasmine and karma.

### Software Engineer, Quest Global

Trivandrum

Jul 2018 — May 2019

- Designed user interfaces that engaged multiple senses and produced immersive experiences.
- Used specific code versioning tools to manage and implement changes to programs.
- Tested applications prior to final review to verify efficient issue resolution. Applied various techniques to locate bugs and errors in applications.

#### PROJECT:

CCS Viewer in Kyma platform: It usually records the list of patients who were admitted at the remote end where the doctors can visualize and analyze the records of patients based on simulator data. All the records related to patients like their date of admission, his health-related parameters like spo2, ECG, and satO2 are recorded.

### Software Engineer, Rectrix technologies pvt ltd

Bangalore

Jun 2016 — Jul 2018

Worked on the design and development of web application using jQuery, JavaScript, and angular.

Applied various techniques to locate bugs and errors in applications.

Prepared clear design documentation for the application.

#### PROJECT:

#### SALUS CONSUMER APPLICATION:

This project mainly concentrates on home automation with smart devices where a user can customize his preferences through application by interacting with real devices. The main theme regarding the application is that there will be a different status list where a user can set his own rules under the preferences section like home, away and vacation. Under these statuses or rules, he can customize the device properties depending on his needs and circumstances. The details regarding the devices like battery low, gadget damaged, and devices that need to be upgraded are present in the alert section of the application. The alert messages are sent via Gmail or SMS

## EDUCATION

### B.E, Visvesvaraya Technological University, Belgaum

Jun 2011 — Jun 2015

Graduated in Information Science and Engineering.
