### Project #1: Product Development

**Product Name :** CLEAR

**Duration :** Mar 2019 – till date

**Description :**

CLEAR™, the world's first, proven multi-cloud-enabled Media ERP Suite that automates the content supply chain and builds a connected enterprise. Deployed successfully on Cloud for the last twelve years, CLEAR helps content makers enhance efficiencies, realize new monetization opportunities and reduce Total Cost of Operations (TCOP) like none other. With Work Order Management embedded in MAM, and transformational AI-led solutions, CLEAR as a Media ERP software offers much more than any other MAM system.

#### Role and Contribution in the Project:

- Developing new features in the product according to client requirements using different technical languages like C#, .Net Core, SQL,.Net frame work, React JS etc.,
- Working on issues of roles/entitlements/applications workflows.
- Worked on workflows which will be developed with java.
- Worked on integration of workflows with dotnet API's.
- Worked on user issues regarding failures in the file uploads and downloads.
- Worked on UI changes required for the product using HTML and aspx.
- Changing the feature status based on the user requirements.
- Stabilizing the Dev Environment for Development.
- Supporting QA after releasing the new feature or enhancements for testing.
- Issues fixing which are raised by QA while testing.
- Involving in Production Deployment for giving support and on spot fixing of issues if any.
- Development includes multiple Uploads and Downloads of different extensions files using different technical languages like Dotnet Core, ReactJS, Java etc.,
- Involved in Special Teams for hot fixes for the client requirements.
