EXPERIENCE

Name of Company	**Place of Work**	*Date*
"**ForceIQ(A Plum Tree Group Company)**"	Jaipur, Rajasthan	23 March 2020 – Current

Works as a salesforce developer building healthcare solutions for one of the big client i.e "Humana" with help of technologies such as Lightning Web Components and Communities.

Name of Company	**Place of Work**	*Date*
"**Metacube Pvt. Ltd.**"	Jaipur, Rajasthan	03 July 2017 – 22 March 2020

Works as a salesforce developer and provides services to big client companies by enhancing the salesforce platform and integrating third party apps to these platforms.

KEY PROJECTS

"Humana" (*Salesforce Project* **):**

Currently developing Large Group Quoting feature/platform for Humana, where all the details related to Medical, Vision, and Dental Insurance Policy are quoted to customers. Tools used are Lightning Web Components, Communities, sharable records

"Financialforce Service" (*Salesforce Project* **):**

Currently working on integration work, where task was to integrate conga process on salesforce platform, which could help download sales invoice detail in a more fascinating template look. This was done on sencha

page (i.e. extjs page). Previously, also implemented BAF (Batch Apex Framework) for payment in financial service.

- **Reminder Process For Payment Due For Users :** Implemented BAF For the automation of reminder email process which included some reminder rules and when the rules were satisfied for a particular day , it lists all the document payment due for the user and we have a option to send them reminder in bulk. Technologies used were :
  - o **Batch Apex Framework**
  - o **Conga Batch/Composer**
  - o **Extjs Framework**

- **Archiving :** It included deleting data in bulk from the given org. This was again implemented with help of **BAF** and **Visulaforce Pages.** The whole idea behind this feature was to make the feature in such a way that it could be enhanced for other documents later on as per requirement without any complexity.

- **Prepaid Expenses :** In financial services term, all your future expenses are converted into proposed journals. This feature was implemented with help of **Lightning Web Components,** where one could easily have visual prospective of proposed journals and once verified the journals could be generated there itself without any extra effort.

ACADEMIC EXPERIENCES

- Selected for the first round in **ARM** Contest Conducted by **ADCOM** in collaboration with **IIT MADRAS** ,and certified for the same.
- Also successfully completed "**TI BeagleBone Black**" Workshop and certified for the same.
- Also participated in "**TI Analog Maker Competition**" held by **TEXAS INSTRUMENT** and certified for the same
