## Work Experience

### Deloitte (US office in India)

September 30, 2019 to Present

#### Consultant | Capital Project Consulting, Internal Audit, ITGC Control Testing, Controllershship and Valuation

Worked on an engagement with multinational automobile manufacturer for reconciliation of balances in SAP.

- Drove growth in service excellence and customer satisfaction by analysing balances in different accounts and ways to reconcile.

Worked on an engagement with multinational bank for business process improvements.

- Drove growth in service excellence and customer satisfaction by analysing system workflows, recognizing and eliminating all crucial gaps. Led rapid technological adoption across all facilities by conducting weekly educational sessions for various key facility managers.

Worked on various engagements helping clients assess, test, and improve their processes, controls and underlying systems in the areas of technology risk, internal controls, and risk management.

- Identified key controls, assessed controls for design deficiencies, and testing of operating effectiveness in compliance with tests plans.
- Performed independent, remediation and reperformance testing for various client specific applications / systems for various industries.
- Documented and communicated findings and conclusions to management as it relates to policy compliance and risk mitigation.
- 3-way coordination between client contacts, internal assessors and the Deloitte US, India and member firm teams.
- Identified mitigating factors for findings with respect to clients' control environments

Purchase price allocation valuation related to the acquisition of a company focused in oil and gas, mining, marine and telecom solutions. Major assets included equipment related to the manufacture and service of surface and underground mining equipment.

- Testing change order verification claim worth 3 billion USD for a major steel company infrastructure upgradation.
- Performed a valuation analysis for tax purposes for a major energy company. The valuation included petroleum storage facilities and related assets as well as a full reconciliation/build-up of the asset register for tax advice purposes.
- Performed a valuation analyses for insurance and purchase price allocation purposes related to a large, international mining company. Also performed a full asset register reconciliation for compliance purposes. Major assets valued included processing plants and heavy mining vehicles and equipment.
- Performed valuation to assist a contract drilling and drilling-related services company with fresh start accounting under ASC 852 in connection with emergence from Chapter 11 bankruptcy. Valuation analysis included land and barge rigs, rental tools, materials and supplies inventory, and certain intangible assets.

- Performed valuation in accordance with fresh start accounting for three separate domestic oilfield services companies with lines of business including well completions, hydraulic fracturing and other pressure pumping services, fluids management, fishing and rental services, and well workover and servicing operations.
- Performed a purchase price allocation valuation related to the acquisition of a company focused on natural gas storage. Major assets included pipelines, compressors, and salt caverns.
- Performed a purchase price allocation valuation related to the acquisition of a chemicals company primarily in the Middle East. The major assets were crackers related to the production of ethylene and other desired products.
