Capgemini Technology services Working as a Mule soft Developer (June 2020 - October 2023)

TECHNICAL SKILLS:

Technologies	:	Mule ESB 4.3, Anypoint Studio, REST, XML, JSON, Cloud hub, SQL Server, RAML
Services	:	RESTful, JSON.
Web/App Servers	:	On Prem, Tomcat.
Databases and Tools	:	Oracle10g/11g, My SQL.
OS and Tools	:	Windows7, 8, 10, XP, UNIX
Tools	:	Service Now, GitHub, Maven
Testing/Logging tools	:	MUnit, JIRA
Mark-up Languages	:	XML
Middleware Tools	:	MuleSoft 4.x
Tool	:	SQL Developer, Postman, Soap UI
CI/CD	:	Devops, Jenkin

PROFESSIONAL EXPERIENCE:

PROJECT 1:

Project & Client	Bank of America
Domain	Integration
Role	MuleSoft Integration Developer
Environment	Anypoint Studio, Mule ESB, RAML, API Design, Cloud hub Report and Any point Platform.

DESCRIPTION:

Bank Of America Financial Corporation is an American bank holding company specializing in credit cards, auto loans, banking, and savings accounts, headquartered in Charlotte is a major city and commercial hub in North Carolina .Bank of America can help you find the right credit cards; checking or savings accounts; auto loans; and other banking services for you or your business.

RESPONSIBILITIES:

- Done with transformers, exception handling, testing & security of Mule ESB endpoint through OAuth.
- Used Data Base Connectors to connect with respective systems using Mule ESB.
- Experience in Any point API platform on designing and implementing Mule APIs.
- Created MULE ESB artifact and configured the MULE configuration files and deployed to Live Environment.
- Designed and developed APIs using API Manager.
- Added new APIs by importing from existing exported API configuration zip file.
- Created new mule integration flows for new applications using Design Centre.
- Extensively used Mule Components that include Data Weave, FTP/SFTP Transport and JDBC Connector.
- Configured different Mule Connectors like HTTP, Database.
- Designed and developed enterprise services using RAML, REST based APIs and deployed to portals.
- Configuring the Mule process for fetching the data from topic and makes web service calls to the middle tier
- Mule ESB for processing and put the data on the Cloud hub.
- Used GIT as version controlling tool and maven for Building and deployed Application to Mule On cloud.
- Developed the integration flows using a Mule Soft ESB framework.

PROJECT 2:

Project	Century Link, USA
Client	USA
Designation:	Java Developer
Technologies	Spring Boot, Java, Rest API, Apache Tomcat, Micro Services

DESCRIPTION:

Century Link builds telecom sites, provides allocation sites and In-Building passive infrastructure sharing opportunities for all of US Mobile Network Operators (MNO). Century Link United States has also developed a host of sophisticated processes and systems that help customers establish their communication network with speed and ease. These processes and systems are especially designed to maximize collocation networks with cost saving

RESPONSIBILITIES:

- Involved in design and development of the user interface.
- Writing the dependencies using spring IOC framework.
- Implemented Hibernate framework for mapping Java classes to database tables.
- Involved in writing service classes and Data Accessing Components.
