Employment

Senior Technology Consultant – SAP Data & Analytics Advisory, PwC LLP (California)

February 2017 — Present

Clients: Weber Stephen; CenterPoint Energy; The Coca-Cola Company; WEC Energy Group; Internal

Technical Program Manager and Delivery:

- **Managed & partnered with** cross-functional engineering and integration teams to lead strategic initiatives for SAP Automation & Industrialization to create **SAP JIRA-specific template** by partnering and onboarded two pilot clients that served as a strong foundation for future engagements
- **Assumed the role of reporting & analytics lead** and developed interim and future state (2022) **reporting & analytics strategy**, and governance model for a **\$1.2B company**
- **Built data-driven project management framework** for leadership & teams to set, achieve and measure projects' success and challenges, and automated Power BI dashboards that saved ~15 weekly man-hours
- **Collaborated with cross-functional teams** to integrate ~300 business requirements into user stories & produced functional specifications to instrument a data warehouse for Finance & Supply chain verticals
- **Managed detailed work plans & mentored teams** in design and development of ETL Architecture; conceptualized dashboards and implemented effective project documentation to empower stakeholders
- **Managed a team of 12 developers** to design & deploy enterprise dashboards, leveraging SAC and CDS views; created a **global downstream impact** by discovering overpayment to vendors of over **\$50M in accounts** receivable reports
- Adept at driving a project from **start to signoff** – Developed a **communication cadence for successful on-time delivery** of reporting objects, from build to deployment in production (SDLC); and delivered 60 objects by defining scope for Business Warehouse reports
- Continuously reevaluated risk, business impact, and SLAs, to analyse the-then state and mitigate a portfolio of **13 legacy data sources to S/4 HANA for Coca-Cola** through an **agile based approach**
- Automated defect reporting for IT cycles at WEC to drive **18% reduced efforts for over 15,000 defects**

Technical Architecture:

- Analysed **customer's top governance challenges to devise an architecture** around standardization of data needs, and minimized IT dependency through development of personas and roles for different users across the enterprise
- Converted reporting requirements **into logical data models and architected a high-performing**, multi-tier data platform that provided reliable data access to business users to analyse, report, and enable risk mitigation with enhanced decision making
