JAN 2017 – AUG 2017

Capstore, Capgemini
Pune, India

Capstore is Capgemini's digital warehouse which contains all its reusable digital assets. It stores IPs, ideas, whitepapers, widgets and tools that were created for various projects. One can now reuse these assets to leverage your effort, enhance your estimation and accelerate the development time.

● **MAY 2016 – JAN 2017**

Mobile Wallet, MasterCard
Pune, India

A mobile wallet application built in Android using Android HCE (Host Card Emulation) service and creating wallet for different issuer banks. The idea was to create cashless payment for every issuer's wallet where a user can make their payment by tapping on POS terminal.

● **JAN 2015 – APR 2016**

National Bank of Abu Dhabi
Abu Dhabi, UAE

A web based responsive application for employees to showcase their performance in front of everyone and to appreciate other's performances as well. This application was developed basically to motivate employees towards work and to get information about other employees in the organization. User can search for any of the employee in the organization and can view his/her profile or can award him/her directly/ In addition to it user can view the tree diagram structure for the selected person's managers, peers and team.

● **JUN 2014 – DEC 2014**

Cooperative Bank
Pune, India

A banking web application developed for desktop, mobile and tablet using Kony Studio. It is quite similar to the other banking applications. It has many features like securing messaging, requesting a credit card etc.
