PROJECTS

Backend for a Food Ordering App

- Developed a scalable distributed backend for an app that allows users to browse and order food from nearby restaurants.
- Implemented GET API and the corresponding request handler and response methods to retrieve a list of restaurants from MongoDB based on a user location.
- Used Spring Boot as the backend framework, Mockito to enable development of the relevant MVCS layers independently.
- Used a Redis cache to alleviate read performance.

Stock Portfolio Analyzer

- Backend for a visual stock portfolio analyzer to help portfolio managers make trade recommendations for their clients.
- Implemented the logic of the portfolio manager and published it as a library.
- Refactored code to add support for multiple stock quote services.
- Skills used: Java, REST API, Jackson, Gradle.

Q/A Application with REST

- Backend for a quiz application using REST endpoints.
- GET endpoint to fetch questions for a given module and POST to submit quiz answers and return an evaluation.
- Skills used: Spring Boot, Spring Data, JUnit, MongoDB.

Ticket System for SharePoint Requests

- Developed a ticket system for requests related to internal SharePoint Platform.
- Implemented customized form validations using Javascript and writing SharePoint Workflows for business logic.
- Skills used: jQuery, SharePoint Workflows, Javascript.
