- Maintaining web-based applications.
- Testing functionality for users and the backend.
- Presenting work in meetings with clients and management.
- Ensuring that integrations run smoothly.
- Scaling projects based on client feedback.

PROJECTS

Telr | Senior Full Stack Developer (Angular Team-Lead)

Telr is a cutting-edge fintech project that I had the privilege to work on. As a key member of the development team, I contributed significantly to the successful implementation of this project, which involved complex algorithm development and the integration of various payment solutions using Node.js and Angular.

Patient Registration System for EMR | Senior Angular Developer

The Patient Registration System for EMR is a robust and user-friendly solution designed to streamline and enhance the process of recording patient information within a healthcare facility. This system acts as the first point of contact between the patient and the electronic medical records ecosystem, ensuring accurate and comprehensive data capture.

Hotels & Restaurants Solutions | MEAN Stack Developer

A comprehensive Hotels & Restaurants Solutions system is designed to streamline and enhance the overall operations of hospitality businesses, including hotels and restaurants. This integrated solution covers various aspects, from reservations and guest services to point-of-sale and inventory management.

CSM with admin panel | MEAN Stack Developer

A Customer Service Management (CSM) system with an admin panel is a comprehensive solution designed to streamline customer interactions, support processes, and overall service management. The admin panel serves as a centralized control hub for managing system settings, user roles, and accessing key insights.

Industrial Temperature Monitoring System | Senior Angular Developer

The Industrial Temperature Monitoring System is a comprehensive and real-time solution tailored for industrial settings where maintaining precise temperature levels is critical for operational efficiency, product quality, and safety compliance. This system employs advanced sensors, data acquisition modules, and a centralized monitoring platform to provide accurate and timely temperature information.

School Management System | Senior Angular Developer (Team-Lead, Asp Dot Net Developer)

A School Management System serves as a comprehensive tool for educational institutions, optimizing processes, enhancing communication, and providing valuable insights for informed decision-making. It contributes to the overall efficiency and effectiveness of school administration, creating a more streamlined and technologically advanced learning environment.

Stock Management System | Laravel Developer

Stock Management System is a crucial tool for businesses involved in inventory and supply chain management. This system efficiently tracks the flow of goods, manages stock levels, and optimizes inventory processes to ensure businesses can meet demand while minimizing carrying costs.

Stock Management System | Laravel Developer

Stock Management System is a crucial tool for businesses involved in inventory and supply chain management. This system efficiently tracks the flow of goods, manages stock levels, and optimizes inventory processes to ensure businesses can meet demand while minimizing carrying costs.
