PROJECTS

Hospital Management system

The objective of the Hospital Management Project was to maintain data of Doctor, Patient, visit of patients to Doctor and Hospital, and approval of the new Doctor to be done by Hospital chairman
Project Overview : Hospital Management System provides a platform to automate the all the healthcare activities. It provides health data exchange capabilities. Clinicians get a single, fully integrated view of patients within their own native EHR and workflow. That gives them immediate access to actionable information for better decision making – and superior care coordination

Roles And Responsibilities :-, Customize and personalize Salesforce.com based on requirements, Creating Objects and Validation Rules inside Salesforce.com and Mapping them to the existing functionalities and Objects, Maintain and developing the Custom objects, Custom fields, Custom tabs, and Validation rules, and Record Types, Customized different Page layouts and assigned them for different profile users, Creating Workflow Rules, Tasks, Email Alerts, and Components to the needs of the application, Worked on workflows for field updates based on time-dependent workflow, Worked on workflows for field updates based on time-dependent workflow
