- Test Lifecycle Management Service (Titan.com)

This project has been tailor-made for test lifecycle management. It was built based on our experience with implementing test life-cycle management systems. One of the core design goals of TITAN is to reduce the pain points in planning, scheduling test activities, data storage, and retrieval. It improves efficiency by improving collaboration. TITAN eliminates the need for excel based scheduling and planning. It standardizes testing thereby reducing human errors. TITAN provides seamless integration with existing enterprise tools.
