PROJECT EXPRIANCE

Project Name: Netezza migration

Domain: Hospitality

Client: Marriott International

Description:

A Leading American Hospitality company that operates, franchises, and licenses lodging including hotel, residential, and timeshare properties have been using legacy warehouse architecture. The customer has faced multiple challenges in migrating the legacy Netezza warehouse to cloud based warehouse (Snowflake). As part of the project, we are migrating Netezza Database to Snowflake database with some re-engineering but without impacting the downstream applications like Cognos reporting, extracts etc. This will provide like-to-like reporting capabilities for End users along with data quality, accuracy and improved performance

Roles & Responsibility:

- Facilitates sprint planning, daily scrums, retrospectives, customer meeting, and software demonstrations.
- Protect development team from outside distraction, impediments, or team conflicts, and maintain focus on product backlog project timeline.
- Work closely with product owner in backlog management and continuous delivery of features.
- Educate and reinforce scrum methodology and agile framework to team members and stakeholders.
- Direct and lead development team from project inactions through the delivery of final product.
- Demonstrates a commitment to quality and getting the best from people.
- Understanding of incremental delivery and the value of metrics including backlog tracking, burn down metrics, acceptance criteria, velocity, and task definition.
- Able to facilitate the effective breakdown of epics into user stories, to attain high levels of sprint velocity within corporate constraints, to plan and execute against sprint roadmaps.
- Lead release teams through look-ahead planning, release planning, backlog grooming, sprint planning, defect management, test execution.
- Create and execute test scenarios for beverage management systems, coordinating with in-sprint and quality assurance testers. Direct and lead development team from project inactions through the delivery of final product
- Defect management meetings with stakeholders, product owners, and development teams.

Project Name: : Zalando

Domain: ECommerce

Description:

Zalando SE is a European e-commerce company based in Berlin, Germany. The company follows a platform approach, offering fashion and lifestyle products to customers in 17 European markets. Zalando was founded in Germany.

Roles & Responsibility:

- Direct and lead development team from project inactions through the delivery of final product
- Work closely with project owner in backlog management and continuous delivery of features.
- Lead release teams through look-ahead planning, release planning, backlog grooming, sprint planning, defect management, test execution.
- Protect development team from outside distraction, impediments, or team conflicts, and maintain focus on product backlog project timeline.

- Lead release teams through look-ahead planning, release planning, backlog grooming, sprint planning, defect management, test execution.
- Influence others including those more senior in agile methods and test-driven development.
- Facilitates sprint planning, daily scrums, retrospectives, Customer meeting, and software demonstrations.
- Protects the team from over-committing.

Project Name: KOOVS

Domain: ECommerce

Description:

The application is a 2-piece solution. Which contains the manage module from where the application can be configured as per the needs of the end users. This project is an integrated solution offered by us to our client who helps out clients to monitor and organize.

Roles & Responsibility:

- Work closely with project owner in backlog management and continuous delivery of features.
- Protect development team from outside distraction, impediments, or team conflicts, and maintain focus on product backlog project timeline.
- Lead release teams through look-ahead planning, release planning, backlog grooming, sprint planning, defect management, test execution.
- Influence others including those more senior in agile methods and test-driven development.
- Facilitates sprint planning, daily scrums, retrospectives, Customer meeting, and software demonstrations.
- Protects the team from over-committing.
