PROJECTS

EY Lobby

- EY Lobby is a multi-tenant, client-facing web application product hosted in the cloud. This will enable EY clients to view and submit hotel reviews, view ratings based on reviews, view hotel amenities, provide client travel management teams the ability to upload and administer their own data, upload travel itineraries, manage hotel promotions as PDFs to be displayed.

EY Predict Intelligence

- EY Predictive Intelligence application is a go-to market solution to help EY's service lines take advantage of Artificial Intelligence and Machine Learning models in client service delivery. The objective is to empower business users to take advantage of AI/ML capabilities without having to depend on data scientists to train and run predictions.

Virtual Assistant

- Virtual assistant application is a go-to market solution to help companies to take advantage of assistant in their daily life.

Sel Comcast

- This project provides the solution to integrate the third party end points with client facing service. This includes a react based website for API assessment and .NET Core based backend services.
