**Responsibilities:-**

- ❖ Handled a team and involved in giving KT and training new joiners
- ❖ Involved in distributing the work among the team.
- ❖ Worked on website Development.
- ❖ Worked on Application Development

The Client was approached for requirements. The contents of website were explained to the clients. The templates sample was also shared with clients. The same template was designed using HTML5, CSS3, JavaScript, React, The sample had to be shown to the clients and based on their feedback the website was developed. The Application was developed using PHP and MySQL and CRUD operations were carried out as required by the clients. The maintenance of the software was the main motto of this organization.

**Project Details:** (Eminence Techno system)

- ❖ Team Size: 6
- ❖ Role Played: Web Developer /UI Developer
- ❖ Technologies Used: ReactJS, NodeJS, Mongo DB
- ❖ Duration(July 2018 – June 2019)

**Responsibilities:-**

- ❖ Implemented screens and logic for the application.
- ❖ Involved in end to end development of component.
- ❖ Implemented code for Activity Report Creation.
- ❖ Involved in pre-release verification of stories in applicable environments.
- ❖ Written unit test cases for packages to meet the release criteria.

Ever since e-commerce penetrated the mainstream industry, e-commerce websites (like Amazon, Flip kart etc.) have become omnipresent. These apps are now an integral part of our lives. So we had to do an E-commerce website using React js which was front end and Mongo dB for backend.

**Project Details:** (Eminence TechnoSystem)

- ❖ Team Size: 2
- ❖ Role Played: Full Stack Developer
- ❖ Skilled Used: HTML5, CSS3, PHP, MYSQL, JavaScript, AJAX. jQuery
- ❖ Duration(March 2021-May 2022)

Emmy Desk is an application for the internal employees. It keeps track of employees login time and logout time. There are 4 modules for login. They are Admin, HR-Admin, Recruiter, and HR-Recruiter. Everyday activities and uploading of resumes are stored in database. There is a search option in this application which makes the application friendly.

**Project Details:** (Eminence TechnoSystem)

- ❖ Team Size: 2
- ❖ Role Played: Web Developer /UI Developer
- ❖ Skilled Used: HTML5, CSS3, WORD PRESS, jQuery
- ❖ Duration(January 2021-May 2022)

Websites of different clients were developed. Had to prepare workflow and give them timesheet about how many days are required to develop websites. Company's website [www.eminencetechsystem.com](http://www.eminencetechsystem.com) was also redesigned. Had onsite clients which needed the websites for their business purpose and also applications for the clients.

**Project Details:** (Photon InfoTech Private Ltd.,)

- ❖ Team Size: 5
