## Professional Experience

### BORN COMMERCE PRIVATE LTD.

FEBRUARY 2016- PRESENT

#### SENIOR LEAD ENGINEER

##### Client: HoAD | Technology: Salesforce Commerce Cloud

Responsible for the entire project from discovery. Launch of 4 parallel apparel sites with multiple integrations.

- QwikSilver Gift Voucher integration and loyalty CRM system integration.
- Integration of 3 different payment gateways – Razorpay, Paypal and Adyen.
- Complete fulfillment process with vinculum OMS integration along with development of custom returns module.
- Business Manager customization to add new modules and screens in BM.
- Page designer customization with creating new components.
- B2C CRM Sync integration with Salesforce service cloud and email integrations with Salesforce marketing cloud.
- OCAPI customizations for OMS data processing.
- GTM, facebook pixel, pixibo integration along with generation of csv feed files.
- Working and improving site performance resulting in a super-fast website.
- SRA documentation along with designing the complete system architecture and providing technical solutions.
- Managing a big team and client discussions striving for a timely delivery.

##### Client: INOR | Technology: SAP CX 2005

Responsible for the entire project from discovery. It is kind of a hybrid marketplace for selling furnitures and fully furnished flat through the B2B module.

- Creating a custom plan module which enables to sell product and properties together as a fully furnished flat leveraging the B2B Quotes module.
- Implementation of custom solr search containing a new search as property search.
- Integration of payment gateway – Veritrans as SOP implementation.
- Creation of a custom marketplace for furniture, where furniture from different platforms are sold and also designing the order fulfillment process for the same.
- Integration with SAP Customer data cloud for login and registration. Also customizing the existing SAP CDC to fit in with the client b2b requirements.
- Implementation of custom wishlist feature for products and properties.
- As senior lead, leading the entire project along with business understanding, nurturing junior devs, managing tasks through JIRA and ensuring a complete bug free timely delivery of the same.
- Worked on multiple discovery sessions brainstorming, creating development estimates and segregation of tasks for multiple phases. Also created TSD for the current project.
- Responsible for CCV2 deployments.

##### Client: Astra | Technology: Hybris 6.0

It was a code review project, where I reviewed the entire existing system for issues, coding standards and guidelines. Along with this also worked on providing various new design solutions to improve on the performance of the existing site.

#### LEAD ENGINEER

##### Client: Adastra | Technology: Hybris 6.6

Handled the entire **order module** and helped in designing the **headless commerce framework** for the project.

- Under order module
  - Worked on the complete fulfillment process of the order.
  - Designed and created an extensive and complex returns flow including fulfillment and infinite exchanges.
  - Designed the complex inventory structure which involves temporary inventory locks in cart.
  - Worked on multiple payments such as GMO and CVS (Convenience Store)
  - Worked on integrating the ERP through web services.
