WELCOME TO MY RESUME

OBJECTIVE

I aim to thrive in a dynamic environment, leveraging my skills for the benefit of both the organization and myself. I am eager to gain valuable exposure and broaden my knowledge in various areas.

PROFESSIONAL SUMMARY

- Experience of more than 4 years working on front-end technology to create user-interfaces in React.js.
- Having technical expertise and good exposure on UI development using HTML-5, CSS, Bootstrap, Javascript and React Js - React Hooks, React-Router, Redux, Thunk & Saga.
- Knowledge of Node Js and Express Js. Understanding of server side scripting languages and basic API creation
- Working experience in GitHub, Visual Studio Code and Agile methodology - Scrum.
- Ability to work under any given environment and deliver quality product on time.
- Open for new technologies, challenges and quickly able to adapt.
- Possess knowledge of mongoDB, a flexible NoSQL database, to streamline data for developing application.
- Familiar with creating Custom Reusable React Components Library.
- Good experience in JSON, Node Package manager (NPM), Rest API.
- Working experience in GIT and GitHub for source code management, Visual Studio Code.
- Experience in all phase of SDLC like Requirement Analysis, Implementation and
- Maintenance.

EDUCATION

○ Bachelors of Engineering

Shivaji University Kolhapur

SKILLS

React JS 

JavaScript 

TypeScript 

HTML 

CSS 

Bootstrap 

Redux 

Material UI 

Git 

WORK EXPERIENCE

- TechSolvent Software Technologies 2022 - Present
Software Engineer
- Infosys 2021 - 2022
Software Engineer
- TechSolvent Software Technologies 2019 - 2021
Software Engineer
- Tata Communications Ltd 2018 - 2019
Software Engineer

PROFESSIONAL EXPERIENCE

CLIENT NAME: HAWAIIAN AIRLINES

Description:-

It is the largest operator of flights to and from Hawaii. It ranks as the tenth-largest US airline, headquartered in Honolulu. The airline's main hub is at Daniel K. Inouye International Airport, with a secondary hub at Kahului Airport. It has a strong safety record and is known for its on-time performance and customer satisfaction.

Responsibilities:

- Develop and maintain user interfaces for revenue management systems using React.js, HTML, CSS, and JavaScript, with a focus on creating efficient and user-friendly experiences using a component-based architecture.
- Connect with API services using Axios/Fetch to ensure seamless integration.
- Collaborate with cross-functional teams to understand requirements and translate them into technical solutions, utilizing project management tools like JIRA.
- Implement responsive designs and optimize UI performance by leveraging CSS frameworks such as Material-UI to enhance the efficiency of revenue management processes.
- Integrate with backend APIs and services, leveraging technologies like RESTful APIs to retrieve and update data for cargo bookings, capacity management, and revenue optimization.
- Write clean and maintainable code, adhering to best practices and actively participating in code reviews using version control tools like Git and Github.
- Conduct thorough testing and debugging of UI components using testing frameworks like Jest to ensure a stable and reliable revenue management system.
- Gather feedback from stakeholders, understand user requirements, and continuously improve UI designs and features using prototyping tools like Figma.
- Provide technical guidance and support to junior developers, fostering a collaborative and conducive learning environment.

CLIENT NAME: PAR PACIFIC**Description:-**

Par Pacific Holdings is a Houston-based American oil and gas company involved in exploration, production, and midstream operations. It owns the largest refinery in Hawaii with a 94,000-bpd capacity and distributes refined products through retail locations. The company also owns a refinery and pipelines in Wyoming, along with a 42.3% stake in Laramie Energy, focusing on natural gas operations in Colorado's Piceance Basin. Par Pacific Holdings is recognized as a Fortune 1000 corporation.

Responsibilities:

- Gain a comprehensive understanding of the application's complete source code flow.
- Develop modern, interactive user interfaces for Rich Internet Applications using the latest front-end technologies.
- Demonstrate strong expertise in HTML, CSS, and the ability to write code that is compatible with multiple browsers.
- Utilize a router to implement effective routing within the application.
- Implement a unidirectional flow and manage the application state using Redux.
- Establish connectivity with API services by employing Axios or fetch.
- Guide new team members on the project workflow and provide necessary support.
- Utilize MongoDB for database operations.
- Ensure cross-browser and cross-operating system compatibility of the code.
- Collaborate with the team by pushing and pulling code to the GitHub repository.

CLIENT NAME: H&M**Description:-**

H&M Group is a Swedish multinational clothing company known for its fast-fashion apparel. With over 4,800 stores in 75 markets, it is the second largest international clothing retailer. H&M offers trendy and affordable fashion for all genders and has a strong focus on adaptability to changing fashion trends. Despite past criticism, the company is actively working towards sustainability and has introduced recycled collection lines. H&M's global presence and commitment to fast-fashion make it a prominent player in the industry.

Responsibilities:

- Implemented routing in the application using a Router.
- Developed the front end using HTML5, CSS3, and Bootstrap.
- Gained a comprehensive understanding of the application's source code flow.
- Utilized JavaScript and incorporated ES6 features.
- Managed code versioning through GitHub, including pushing and pulling code to the repository.
