- ❖ Developed custom objects, workflows, Data management.
- ❖ Involved in Setting up Users, roles, profiles and Security settings.
- ❖ Designed and developed various functional needs in the application.
- ❖ Customized page layouts for depending upon requirement.
- ❖ Defined Lookup relationships on the objects.
- ❖ Working on various Triggers for various functional needs in the application.

# PROJECT – 3

## COVID DATA TRACKER (INTEGRATION PROJECT)

### PROJECT OVERVIEW:

In this project, the statistics of the covid 19 was fetched from api.rootnet.in and displayed on the Web Component.

### ROLES AND RESPONSIBILITIES:

- ❖ In my Integration project, First I enter the URL of where the data was to be fetched in Remote Site setting.
- ❖ Then I create an Apex class to convert the data that was available into the JSON format which is our return type.
- ❖ After that I create instance of Http and also create instance of Http request.
- ❖ After Creating instance, I set here Endpoint URL and set method i.e., 'Get' Method.
- ❖ Then I create the instance of response by using instance of Http and send request.
- ❖ By using the instance of response, I get the body.
- ❖ And after getting that body, I deserialized that data and after deserialization saved data in variable and returned it.
- ❖ After that I will show this data in LWC component i.e. Covid Tracker.
