Sheltered Harbor was created to protect customers, financial institutions, and public confidence in the financial system if a catastrophic event like a cyberattack causes critical systems to fail. Implementing the Sheltered

SKILLS

Snowflake Computing.

ETL, Data Warehouse.

SQL, Oracle, Redshift,

Data stage, Talend.

Unix Shell Scripting, Python.

Hadoop, Hive.

AWS, GCP.

Control-M, Cron, Airflow.

Rally, Github.

Agile, Scrum.

Tech - Snowflake Computing, Hadoop, Hive, AWS

Client - Major Merchants in US

Tech - Unix Scripting, Third Party Encryption/Decryption software, Talend, Cron, Airflow

Client - Inhouse

Harbor standard prepares institutions to provide customers timely access to balances and funds in such a worst-case scenario.

Role - Solution Architect.

Pinpoint Analytics — *Business Intelligence Solution*

Pinpoint Datahub is an analytics product targeted for banks/vendors with ability to implement pinpoint marketing mechanisms.

Role - Team Management and Solution Design.

Tech - Datastage, Tableau

Client - US Banks and Finance

Operational Data Store — *Data Warehouse*

ODS is a data parsing and loading project with datastage as an ETL and Oracle for loads.

Role - ETL Jobs Development and Testing.

Tech - Datastage, Oracle

Client - Citibank, Singapore

Marketing Analytics Suite — *Business Intelligence Solution*

Intelligence Business Suite of MAS is an analytics product with components such as ETL and Oracle hosted to provide the reporting layer for the banks across the United States.

Role - Technical Resources Management, Daily Status Reporting, Development, Enhancements and Production Support.

Tech - Datastage, Oracle, Unix Scripting, Control-M

Client - Major Banks in US

Nextgen — *Data Warehouse*

An ETL project developed for a banking client with datastage as an ETL layer and Oracle for database.

Role - ETL Jobs Development, Testing and Support.

Tech - Datastage, Oracle

Client - Citibank, Singapore

Ecomic — *Data Warehouse*

An e-commerce ETL project developed for retail clients with datastage as an ETL layer and Oracle for database operations.

Role - ETL Jobs Development and Testing.

Tech - Datastage, Oracle

Client - Sears, US

iERP — *ERP Solution*

iERP is an ERP product targeted for medium/small scale manufacturing industries with Visual Basic as front-end and SQL server as backend.

Role - Application Development, Product Support and Implementation of the Product.

Tech - Visual Basic, MySQL

Client - Manufacturing Unit
