Profile

Around 9 Years 5 Months of Experience in Business Object XI R2/3/4, Oracle 9i/10g & Tableau in that having 1year 8 month onsite Experience at Singapore

Time Line

IT Convergence
(2012-2013)

JNTU
(2002-2006)

Cybermate Infotek pvt ltd
(2008-2009)

Futura Solutions
(2010-2012)

Cognizant Technology Services
(2013-2017)

HCL Technology Services
(2017-Till Date)

Technical Skils

SAP BODS 10%
Toad 70%
Service Now 40%
Python 30%
Alteryx 20%
Oracle 100%
SAP BO 100%
Terradata 10%
JIRA 50%
SQL Developer 70%
Tableau 80%

HCL Technology Services, Hyderabad	Apr 2019 – Till Date
Client: CITI Bank, India,Banglore	
Project: CITI BI BAU Support	
Role: Sr. Tableau & Business Objects Developer (Team Lead)	
Environment: Tableau, SAP Business Objects 4.2, Designer (IDT & UDT), Web Intelligence, Oracle, SQL Developer.	

Roles & Responsibilities

Ø Analyzed existing Universe and Database to enhance the existing Universe and created new Universe.

Ø Maintained and Enhanced Universes based on financial database.

Ø Created Alerts and implemented ranking in reports.

Ø Worked on Web Intelligence to develop and publish thin client reports

Ø The design process included preparation of flow charts, entity relationship diagrams, designing table structures, normalization/demoralization and defining integrity constraints

Ø Developed universes and reports.

Ø Created Canned Reports with various complex features, created charts and templates.

Ø Trained end users on Business Objects Products.

Ø Experience with the design and development of Tableau visualization solutions

Ø Dashboards and document designing experience

Ø Strong DW-BI Skills; Data modeling and advanced Reporting experience

Ø Advanced knowledge of reports performance optimization; Perform administrative and support activities across a multi-environment Tableau infrastructure including security administration, release management, troubleshooting and general systems maintenance

Ø Perform development activities from gathering requirements and designing solutions, through developing code / reports, to testing and release / deployment

Ø Ability to analyze and dissect user requirements and build front-end BI applications according to specifications

Ø Collaborate with end users, project stakeholders and support partners to identify needs, goals, and business models

HCL Technology Services	**Dec' 2017 – April 2019**
Client : CITI Bank,Singapore	
Project : Business Objects XIR3 to XIR4 Migration	
Role : Sr. Tableau & Business Objects Developer (Technical Lead)	
Environment : SAP Business Objects 4.2, Designer (IDT & UDT), Web Intelligence, Oracle.	

Roles & Responsibilities

Ø Collaborated with IT Project Managers to develop focused plans and solutions.

Ø Involved in requirement gathering of list of reports and universes for the four regions (NAM, EMEAM, BAHMAS, and APAC).

Ø Understanding of criticality of the project from client and created the migration planning accordingly.

Ø Involved in requirement gathering and creating the scope document for all the regions.

Ø Supervised team members and oversaw the deliverables of each member.

Ø Involved in resource planning for the project.

Ø Involved in recruitment of resources.

Ø Involved in rasing the CR in ServiceNow and following up for the approval.

Ø Monitored team progress toward timely delivery of goals.

Ø Managed systems installations and implementations.

Ø Involved in creating and Managing CMC security.

Ø Involved in managing the Users and user groups with their securities.

Ø Designing the Universe and web intelligence securities.

Ø Involved in infrastructure to install the BO4.2 in cloud environment using the Linux system.

Ø Involved individual IT team members in decision-making process through meetings.

Ø Managing the team and assigning the work to the team.

Ø Ensured deadlines were successfully met.

HCL Technology Services	**Apr 2017 – Dec 2017**
Client: Franklin Templeton, India,HYD	
Project: Green Plum to Oracle Hexadata Conversion	
Role: Sr. Tableau & Business Objects Developer (Team Lead)	
Environment: Tableau 10.2, Alteryx, SAP Business Objects 4.2, Designer (IDT & UDT), Web Intelligence, Oracle Hexadata, SQL Developer.	

Roles & Responsibilities

Ø Connecting to databases by using data connect option in Tableau.

Ø Analyzing into the data and preparing the analytics, interactive dashboard designs.

Ø Build advanced chart types and visualizations(like Bar in staked bar charts, Pie charts, Filled maps, Donut Charts)

Ø Combine data sources by joining multiple tables and using data blending.

Ø Using Tableau Server in a basic way to share the visualizations.

Ø Using and implementing Advanced Mapping like (Dual Axis Maps, LOD's, parameters, Groups).

Ø Using advanced Statistics and Forecasting like (Trend Lines, Forecasting).

Ø Using Calculations in Tableau like Creating and Editing Calculated Fields.

Ø Creating and Using Parameters and Using the Parameters and implementing the Reference Lines of the specific charts.

Ø Using advanced Dashboards options for Quick Filters, Actions, and Parameters.

Ø Created the Cascading quick filters in tableau.

Ø Developed the dashboards using the Tableau

Ø Developed the Different work sheet and combining all the worksheets using the Tableau dashboard Tool

Ø Developing the work sheet using the different data source and combining them using the blending.

Ø Developing the dashboard using the Hover/Select/Menu to-do the Action filter's in the report.

Ø Defined the process documents for accessing the BO client tools on SAP environment.

Ø Handling the content administrator activates like creating the groups, folders setting up the security.

Ø Transporting the Content from one environment to another environment.

Ø Involved in creating the restrictions in the Universe Layer and assigning the restrictions to the User Groups.

Ø Created variables, formulas and used contexts (in, for all, for each).

Ø Created Web Intelligence reports using Multiple Data Providers, Prompts, break, filter, rank, alerts, Slice & Dice and Drill up/down functionality.

Ø BO content (universes, reports) migrations from QA to PROD as per the migration checklist by using Import wizard/SVN control

Ø Involved in status meetings and representing the BOE Admin Team progress on weekly bases.

Ø Tested reports before posting them to the repository (query optimization & performance). ..

Cognizant Technology Services	**Dec 2015 – Apr 2017**
Client: Kaiser, Pleasanton, CA	
Project: Kaiser Risk Engine Optimization	
Role: Sr. Tableau & Business Objects Developer	
Environment: Tableau, SAP Business Objects 4.2, Designer (IDT & UDT), Web Intelligence, Oracle, SQL Developer.	

Roles & Responsibilities

Ø Connecting to databases by using data connect option in **Tableau**.

Ø Analyzing into the data and preparing the analytics, interactive dashboard designs.

Ø Build advanced chart types and visualizations(like Bar in bar charts - Bullet graphs Box and whisker plots Pareto charts)

Ø Combine data sources by joining multiple tables and using data blending.

Ø Using **Tableau** Server in a basic way to share the visualizations.

Ø Defined the process documents for accessing the BO client tools on SAP environment.

Ø Handling the content administrator activates like creating the groups, folders setting up the security.

Ø Transporting the Content from one environment to another environment.

Ø Involved in creating the restrictions in the Universe Layer and assigning the restrictions to the User Groups.

Ø Created variables, formulas and used contexts (in, for all, for each).

Ø Created Web Intelligence reports using Multiple Data Providers, Prompts, break, filter, rank, alerts, Slice & Dice and Drill up/down functionality.

Ø BO content (universes, reports) migrations from QA to PROD as per the migration checklist by using Import wizard/SVN control

Cognizant Technology Services	Apr 2013 – Nov 2015

Cognizant Technology Services   **Apr 2013 – Nov 2015**
Client: JPMC
Project: JPMC_DatabaseMigration_OffShore
Role: Sr. Tableau & Business Objects Developer
Environment: SAP Business Objects 3.1/4.1, Designer, Web Intelligence, Infoview, Oracle. ..

Roles & Responsibilities

Ø Migrating the universe from DB2 to Terradata.
Ø Involved in documenting the analyzed universe.
Ø Administrator for SAP BO and BOE Tools
Ø Defined the process documents for accessing the BO client tools on SAP environment.
Ø Handling the content administrator activates like creating the groups, folders setting up the security.
Ø Transporting the Content from one environment to another environment.
Ø BO content (universes, reports) migrations from QA to PROD as per the migration checklist by using Import wizard/SVN control
Ø Tested reports before posting them to the repository (query optimization & performance).
Ø Worked with the supervisor in setting up the security & scheduling, which is done manually in the central management console and publishing wizard.
Ø Migrated Universe/Reports from Development/QA to production..
Ø Worked on Data Modeling, Star Schema Modeling, Snowflake schema Modeling, Fact and Dimension Table design, and Physical and Logical Data Modeling implementations.
Ø Improved the performance of the BO reports by using **Aggregate tables** and Synchronized queries from multiple data providers
Ø Worked with the Business users on the **Business/User Acceptance testing** and **user training on BO 4.1.** ..

IT Convergence, Hyderabad   **Jun'2012 – Mar'2013**
Client: Belkin
Project: Belkin_Report_OffShore_Development
Role: Sr. Business Objects Developer
Environment: SAP Business Objects 3.1/4.1, Designer, Web Intelligence, Infoview, Oracle.

Ø Created reports using Business Objects functionalities like queries, cross tab, master detail reports, formulas, Customized filters to display relevant data, etc
Ø Built reports in Web Intelligence XIR4.
Ø Developed the reports using multiple data providers.
Ø Involved in creating the restrictions in the Universe Layer and assigning the restrictions to the User Groups.
Ø Created variables, formulas and used contexts (in, for all, for each).
Ø Created Web Intelligence reports using Multiple Data Providers, Prompts, break, filter, rank, alerts, Slice & Dice and Drill up/down functionality.
Ø Tested reports before posting them to the repository (query optimization & performance).
Ø Migrated Universe/Reports from Development/QA to production.
Ø Define Classes and Objects in business-friendly terms and arrange them in a logical fashion for end users.

Futura Solutions, Singapore   **Oct'2010 – Jun'2012**
Client: Global Foundries Inc
Project: GF_NEW ERP R12
Role: BO Developer(On Site- Singapore)
Environment: SAP Business Objects 3.1, Universe Design Tool (UDT), BI Launchpad, Webi Rich Client, Oracle

Ø Use of BO Designer Module to create Universes, linkages between tables, creating prompts and queries, parsing the Universes, applying contexts and alias tables to remove cyclic dependencies.
Ø Created reports using Business Objects functionalities like queries, cross tab, master detail reports, formulas, Customized filters to display relevant data, etc
Ø Built reports in Web Intelligence XIR2 and Desktop Intelligence XIR2.
Ø Created the Macros in the Bo deski reports to Burst Out in server Folder's.
Ø Involved in creating the Ftp Scripts to publish the report to Foundry View.
Ø Involved in the development of reports by using Crystal Reports XI and Oracle 9i as database.
Ø Implemented the Functions in Universe.
Ø Developed the reports using multiple data providers.
Ø Involved In creating the Users and User Groups.
Ø Involved in creating the restrictions in the Universe Layer and assigning the restrictions to the User Groups.
Ø Created variables, formulas and used contexts (in, for all, for each).
Ø Created Web Intelligence reports using Multiple Data Providers, Prompts, break, filter, rank, alerts, Slice & Dice and Drill up/down functionality.
Ø Migrating the Reports, Universes, users from 5.1.x to XIr2.
Ø Tested reports before posting them to the repository (query optimization & performance). ..

Cybermate Infotek Pvt. ltd, Hyderabad   **Jul'2008 – Dec'2009**
Client: Sainsbury Ltd
Project Name: Sainsbury's F&A
Role: Business Objects Consultant

Roles & Responsibilities

Ø Use of BO Designer Module to create Universes, linkages between tables, creating prompts and queries, parsing the Universes, applying contexts and alias tables to remove cyclic dependencies.
Ø Created reports using Business Objects functionalities like queries, cross tab, master detail reports, formulas, Customized filters to display relevant data, etc
Ø Built reports in Web Intelligence XIR2 and Desktop Intelligence XIR2.
